Mr Simon Gibson, sworn Examined by Mr. Wolfe KC	3
Lunch Adjournment	72
Mr. Simon Gibson Examined by Mr. Wolfe KC (Cont'd) Questioned by the Inquiry	72 130

1        THE HEARING RESUMED ON WEDNESDAY, 22ND FEBRUARY 2023,  
2        AS FOLLOWS:

3  
4        CHAIR: Good morning, everyone. Apologies for the late  
5        start. I understand we had some technical difficulties 10:27  
6        this morning, and it's Wednesday, not Tuesday.

7        MR. WOLFE KC: Good morning, Chair, Members of the  
8        Panel. Your first witness today is Mr. Simon Gibson.  
9        I think he wishes to be sworn.

10  
11       MR. SIMON GIBSON, HAVING BEEN SWORN, WAS EXAMINED BY  
12       MR. WOLFE, AS FOLLOWS:

13  
14       Q. MR. WOLFE KC: Good morning, Mr. Gibson.

15       A. Good morning. 10:27

16       1 Q. You kindly provided the Inquiry with two Section 21  
17       statements which I'm going to bring up to the screen  
18       now. The first is Section 21, number 17 of 2022. It's  
19       dated 27th June 2022. The first page, if I can show  
20       you it, is WIT-23432. I think you are well familiar 10:28  
21       with that document. I'll just scroll through it to the  
22       last page and show you your signature. It is  
23       WIT-23476. There we go. It's an electronic signature.  
24       The question, Mr. Gibson, is do you wish to adopt that  
25       Section 21 statement as part of your evidence? 10:28

26       A. Yes, please.

27       2 Q. As I've said, you provided a second statement, it's  
28       dated 14th July of last year. First page, please,  
29       WIT-33908. Before I bring you to the last page you've

1 proposed some changes to this statement?

2 A. Mm-hmm.

3 3 Q. You've kindly provided us with an addendum, which I'll  
4 bring you to. Just so I can illustrate to people here  
5 and the public what has been done with this document. 10:29  
6 Can we scroll down to WIT-33921, please? Yes. Just  
7 highlighting the bottom section.

8  
9 One of the changes that you notified the Inquiry that  
10 you wished to make was in respect of the date on which 10:30  
11 you completed the screening report, which we'll hear  
12 more about this morning. It is the fifth and not the  
13 seventh. You have indicated you want to make that  
14 change to the Inquiry and some other changes, and the  
15 Inquiry have annotated your statement accordingly. 10:30  
16 So moving through to the last page of your statement,  
17 WIT-33939. Your signature is there, 13th July, as  
18 I think I said 14th July earlier, it's 13th July. Do  
19 you wish to adopt that statement as part of your  
20 evidence? 10:30

21 A. Yes, please.

22 4 Q. Finally, by way of preliminary, is your addendum. It  
23 is an addendum to this statement 46 of 2022. The  
24 Inquiry received it on 20th February. If we can go to  
25 it at TRU-320001. There we have it. Scrolling down, 10:31  
26 it sets out the, I think, five or six changes. Over  
27 the page, please, which you wish to make to your second  
28 Section 21. As I've explained already, the changes  
29 that you propose have been annotated into the statement

1 and I have shown one example of this. Just down the  
2 page to your signature then and signed electronically  
3 on the 20th. Do you wish to adopt that addendum as  
4 part of your evidence?

5 A. Yes, please.

10:32

6 5 Q. Thank you. Mr. Gibson, we brought you to the Inquiry  
7 today primarily to ask you about your knowledge of the  
8 MHPS process which the Trust deployed in respect of  
9 Mr. O'Brien's practice. You, as we will hear, had  
10 a prominent role as Assistant Director within the  
11 Medical Director's office in 2016 in conducting  
12 a screening report that was used by an  
13 Oversight Committee; isn't that right?

10:32

14 A. That's correct.

15 6 Q. Before we go to all of that, I'll ask you something  
16 about your career within the Trust, and we'll lightly  
17 touch on that.

10:32

18  
19 You came into the Trust, for the first time, in  
20 April 2007; isn't that correct?

10:33

21 A. That's correct.

22 7 Q. You came in in the capacity of Assistant Director For  
23 Surgery and Elective Care?

24 A. That's correct.

25 8 Q. Just in ease of the Inquiry's pen, you've told us that  
26 you've had two roles which have touched upon urology.  
27 The first is that first job in surgery and Elective  
28 Care. You then had a number of other assistant  
29 directorships before taking up a role as assistant

10:33

1 director in the Medical Director's office in  
2 April 2016.

3 A. That's correct.

4 9 Q. And it's in that last job -- I think you still hold  
5 that job, is that right? 10:33

6 A. I do.

7 10 Q. In that last job is your second engagement with  
8 urology; isn't that right?

9 A. Yes.

10 11 Q. Okay. If we could go to your statement, just as 10:34  
11 I said, in ease of the Inquiry's pen, WIT-23435. I'm  
12 just going to scroll slowly down through this. You  
13 helpfully set out in tabular form the various jobs that  
14 you've had. So just pausing here a moment, this is  
15 your assistant directorship in the Surgery and Elective 10:34  
16 Care role?

17 A. Yes.

18 12 Q. You set out the specialties, and your role was to  
19 operationally manage the surgical services and  
20 specialties within the Southern Trust, setting out the 10:34  
21 specialties, and reporting to the Director for Acute  
22 Services; is that correct?

23 A. That's correct, yes.

24 13 Q. Then, scrolling down, you set out the elective targets  
25 and then you move to a new role in September 2009, 10:35  
26 that's the Assistant Director For Best Care, Best Value  
27 and Income Generation. And in September 2009 you're  
28 handing over the baton, if you like, to Mrs. Trouton  
29 who took over from you as Assistant Director in SEC.

1 A. That's correct.

2 14 Q. Scrolling down. Your next role was -- just back up,  
3 please -- was as Assistant Director in Medicine and  
4 unscheduled care, and you held that post for just under  
5 three years, two-and-a-half years, isn't that correct? 10:36

6 A. That's correct.

7 15 Q. Then, as we see, scrolling down, Assistant Director in  
8 the Medical Director's office from April '16, and in  
9 that role you reported to the Medical Director --

10 A. That's correct. 10:36

11 16 Q. -- who in your time changed from, first, Dr. Wright?

12 A. Mm-hmm.

13 17 Q. Then Dr. Khan on an interim basis.

14 A. That's correct.

15 18 Q. Dr. O'Kane? 10:36

16 A. Yes.

17 19 Q. And latterly, you'll have to help me with that,  
18 Dr. Stephen Austin.

19 A. Dr. Austin.

20 20 Q. Thank you. Just touching on your role as Assistant 10:36  
21 Director For Surgery and Elective Care, if we scroll  
22 down to WIT-23435. So your job is to operationally  
23 manage the surgical services and specialists within the  
24 Southern Trust, one of which was urology.

25 A. It was. 10:37

26 21 Q. Isn't the core of your evidence today but I'm just  
27 going to ask you for some reflections on that role.  
28 You've said within your witness statement that the unit  
29 which was urology was understaffed from a medical

1 perspective. There was a requirement for five  
2 consultants to meet the recommendations of BAUS,  
3 British Association of Urological Surgeons, but in fact  
4 you only had two substantive members of staff and one  
5 locum?

10:38

6 A. That's correct.

7 22 Q. You've said that had an impact on the ability to fully  
8 implement all of the recommendations of BAUS and it was  
9 a challenge to deliver on the provision of urological  
10 services in terms of delivering on elective targets for  
11 outpatients, day patients and inpatients.

10:38

12  
13 In terms of the impact on clinicians, the clinicians  
14 that you did have, was this a difficult time?

15 A. Yes, I think it was. I think it was Michael and Aidan  
16 and Mahmoud, Mehmoud Akhtar, who was the locum. We  
17 were very performance driven at that time and we had  
18 very firm targets which we had to deliver in terms of  
19 the 9 weeks and 13 weeks. I think there was a bit of  
20 a demand and a capacity imbalance given the fact that  
21 the number of consultants against the size of the  
22 population within the Southern Trust, yes, I think that  
23 was a challenge.

10:38

24 23 Q. At that time, and we're talking 2009 or so, the  
25 regional review on Urology Service had just reported.  
26 You've said in your statement that locally, that is  
27 within the Trust, a Steering Group formed. You were  
28 part of the project team undertaking an internal review  
29 and calculating -- which included as part of your role

10:39

10:39

1 calculating the capacity gap, identifying national  
2 service standards, recruiting staff, developing  
3 a business case. Was it a fairly turbulent time for  
4 The Trust in terms of Urology Services?

5 A. I wouldn't have said turbulent. I mean it was 10:40  
6 certainly changing. We knew we couldn't stay where we  
7 were and we wanted to expand, but I wouldn't have said  
8 turbulent.

9 24 Q. There was a decision made to relocate the Urology ward  
10 and disperse -- well, the Urology ward at that time 10:40  
11 was, as I understand it, based at ward 2 South.

12 A. Yes.

13 25 Q. Was that reconfigured and patients dispersed to other  
14 surgical wards throughout the hospital?

15 A. I think there was a move from 2 South to 3 South. 10:40  
16 I can't recall exactly when it was, but there certainly  
17 was a move up a floor basically.

18 26 Q. Were the consultants consulted on that?

19 A. I can't recall, to be honest. I think at the same time  
20 we were setting up the Thorndale Unit, which was a 10:41  
21 specific unit to do out-patient procedures and work  
22 which maybe didn't require an in-patient or daycare  
23 stay, but would have been more than an out-patient  
24 consultation. I was involved in setting up the  
25 Thorndale Unit and that may have been part of a 10:41  
26 development of urology services, was to set that up as  
27 well.

28 27 Q. Can I ask you to take a look at your witness statement  
29 at paragraph 33.1. It is WIT-23455. You talk about

1 overseeing the quality of services in urology. Here  
2 you refer to considering documents such as complaints,  
3 SAIs and Datix reports. You then go on to say:

4  
5 "In essence, performance was a subset of quality. 10:42  
6 I oversaw the delivery of access targets through the  
7 performance metrics as outlined at paragraph 34."

8  
9 We can go back there but, in essence, performance --  
10 you seem to be saying performance was judged by 10:42  
11 reference to compliance with the nine-week and 13-week  
12 access targets?

13 A. Yes, no question. At that time we were a very  
14 performance driven organisation and, to me, the prime  
15 focus of the Acute Services in that period was 10:42  
16 definitely hitting those targets.

17 28 Q. When you think about it now, that approach to quality  
18 or that emphasis on access, was that not excessively  
19 narrow?

20 A. Yeah, I can see that now. Yeah, absolutely. 10:43

21 29 Q. Were any other aspects of quality considered or  
22 measured?

23 A. We had a weekly meeting within Acute Services with,  
24 kind of, fellow ADs and the Director. We would have  
25 taken turn about and we would have looked at HR, 10:43  
26 governance, and performance. So they would have been  
27 considered in the governance section. But my  
28 recollection is that the focus was more on performance.

29 30 Q. Performance in terms of inpatients, what about

1           outpatients? Was there an adverse impact on the  
2           ability to address the needs of outpatients?

3           A.    The targets were clear for outpatients and inpatients  
4           in day cases. The ins and days was 13 weeks and the  
5           outpatients was 9. But I would accept the fact that 10:44  
6           the target for outpatients related to new patients and  
7           there was no target for review patients. So when we  
8           were trying to achieve the 9-week target, I certainly  
9           think the focus would have been on the new patients and  
10          I would absolutely concede there were times when maybe 10:44  
11          the review patients would have been adversely affected,  
12          because the focus which was a regionally given target  
13          to us didn't take account of review patients.

14       31   Q.   What was the problem? Was it a shortage of consultant  
15               level and middle grade staff to address the needs of 10:44  
16               the local population?

17           A.    It was a supply and demand imbalance. We had a demand  
18           for 330,000 patients at that time and we only had two  
19           consultants and a locum. They all worked very hard but  
20           I just think that it was beyond them to do that. 10:45

21       32   Q.   One of the consultants within urology, as you've  
22               indicated, was Aidan, as you said, Mr. O'Brien. Had  
23               you many dealings with him?

24           A.    Yes, I did. Yes.

25       33   Q.   In what context? 10:45

26           A.    Usually in terms of hitting the 9-week and 13-week  
27           target. We had an away day at Seagoe, I think it was  
28           in March 2008, I believe, but I would have met Aidan up  
29           on the ward or -- I don't know if Thorndale was open

1 but in terms of getting the Thorndale up and running on  
2 a regular basis, yes, alongside, and it was usually  
3 a discussion on targets.

4 34 Q. When you say a discussion on targets, were you and him  
5 reflecting the difficulties in terms of meeting the 10:45  
6 targets or were you, as the manager, pushing, if you  
7 like, the need to get with the targets?

8 A. I was cajoling to make sure that the targets were being  
9 met, I think is the best way of putting it. I think  
10 that was a difficulty because of the supply and demand 10:46  
11 imbalance.

12 35 Q. Within your statement you say, if I can bring it up,  
13 WIT-23466. And at 54.2, just scrolling down, you say  
14 that:

15  
16 "The earliest evidence I have available to me that  
17 I first became aware of issues of concern relating to  
18 Mr. O'Brien was in April 2008.

19  
20 There was a workshop where the issue of triage was 10:46  
21 discussed and the operational support lead, Sharon  
22 Glenny, spoke of delays in obtaining the outcome for  
23 Mr. O'Brien's triage of referral letters. I think  
24 elsewhere in your statement you emphasised that it was  
25 delays in referrals being performed by Mr. O'Brien, not 10:47  
26 a failure to do them?

27 A. That's correct.

28 36 Q. You go on to say, if we go down to 23470 in the same  
29 statement, WIT-23470. You go on down to the bottom,

1 please. You talk about it being your recollection that  
2 the chasing-up of delayed triage letters did not remedy  
3 the concerns as they continually -- they continued  
4 periodically up until you handed over responsibility to  
5 Mrs. Trouton. You talk about in terms of what could 10:48  
6 have been done differently, a more formal approach  
7 could have been considered rather than what you  
8 describe as the "passive informal method" being used.  
9 what was that passive informal method?

10 A. It would have been either myself or more likely one of 10:48  
11 the team going up to Aidan and maybe chivvyng him  
12 along and, you know, seeking his support in getting the  
13 referrals triaged.

14 37 Q. Were you able to ascertain or diagnose what the problem  
15 was that was causing delay? 10:48

16 A. At the time I think -- I didn't think it was an issue,  
17 anything more than simply kind of supply and demand.  
18 I think there was a lot of referrals coming in that  
19 needed to be triaged. There was also, as you can see  
20 further down in that paragraph, the IEAP had come in, 10:49  
21 it was a new way of working, and Aidan certainly wasn't  
22 alone at that time in struggling to hit that kind of  
23 target for triage. It was a new way of working that we  
24 were asking all of the consultants to comply with and  
25 there was -- I can certainly recall two other 10:49  
26 consultants in different specialties that we had  
27 similar conversations with, but at that time they were  
28 conversations that rectified and solved the problem.  
29 It wasn't as if it was -- Aidan was at that point, on

1 his own, and it wasn't as if the delays were very  
2 significant. He would always say, okay, yes, fine, and  
3 it would be done within two or three days. The  
4 mechanics of the IEAP meant that it was quite a tight  
5 turnaround and the fact we were able to hit the target 10:49  
6 new patients is an indication, you know, that really  
7 his delays were no more or no less than some of the  
8 other colleagues.

9 38 Q. Am I right to detect within the sentence which says in  
10 terms of what could have been done differently, a more 10:50  
11 formal approach could have been adopted. Does that  
12 suggest, looking back on matters now, you think a more  
13 formal approach ought to have been adopted,  
14 notwithstanding what you've said about the new system,  
15 it wasn't the major problem, other consultants were 10:50  
16 slow as well?

17 A. Yes. Knowing now what we know, yes. But I think in  
18 the context of that time, if I had gone to my Director  
19 and said, 'I'm having difficulties with Aidan in terms  
20 of this, I think we should take a formal approach', it 10:50  
21 wouldn't have been fair without taking half a dozen  
22 names at the same time. I don't think I would have got  
23 support in taking half a dozen doctors. So early in  
24 the process of implementing IEAP down a formal process,  
25 I think the response would have been, 'well, keep on 10:51  
26 going'.

27 39 Q. would you have at that time known what a formal process  
28 would have looked like?

29 A. No.

1 40 Q. There was, obviously, as we have heard, a division  
2 between medical management and operational management.  
3 You were on the operational side.  
4 A. Mm-hmm.

5 41 Q. Did you work closely with the operational side within 10:51  
6 the context of urology? Sorry, I should say with  
7 medical or professional side in that context?  
8 A. Yes. I would have had a good close relationship with  
9 Eamon, Eamon Mackle, and Michael Young and Robin Brown  
10 in Daisy Hill, yes, I would have met them regularly. 10:51  
11 I would like to think we had good working  
12 relationships. I didn't perceive any significant  
13 tensions at all. We worked well.

14 42 Q. At no time did you go to them to say, 'triage is  
15 a problem'? 10:52  
16 A. I think there may be in my evidence an e-mail that  
17 I was sent in October which I then forwarded to Eamon.  
18 You know, I would have felt confident in having that  
19 discussion with Eamon.

20 43 Q. Were you surprised in 2016, when you moved to the 10:52  
21 Medical Director's office, to discover that triage and  
22 Mr. O'Brien were still uncomfortable bedfellows, if  
23 I could put it like that?  
24 A. I have to say I wasn't entirely surprised. During the  
25 period when I was managing Medicine and Unscheduled 10:52  
26 Care I would have been at the performance meetings for  
27 elected targets, so whilst I wouldn't have been  
28 directly involved, I would have been around the table  
29 when issues were being discussed, and I'm sure it would

1 have come up during that period when Heather was  
2 managing. It wasn't as if it came out of left field to  
3 me. I would have been aware of ongoing challenges that  
4 were periodic in nature, yes.

5 44 Q. When you took up the role in the Medical Director's  
6 office seven years later, you were aware from your  
7 experience of sitting at performance meetings that  
8 triage was and remained an ongoing issue?

10:53

9 A. Yes.

10 45 Q. Just let's look then at your role within the Medical  
11 Director's Office. As we noted already, you took up  
12 that role in April 2016. Was that part of a natural  
13 rotation of moving directors or assistant directors'  
14 posts, or is it a case of, I've been in this seat too  
15 long, I fancy a change and you apply for the change?

10:53

16 A. No, there was - Esther came into post, Esther probably  
17 came in in 2015. I think it is reflected more in  
18 Heather's statement than mine, she wanted clinical  
19 managers in the roles of assistant director. But at  
20 that time within medicine it was kind of split between  
21 myself and a colleague, Barry Conway. But she wanted  
22 kind of a change of manager in that role. And so she  
23 asked Anne McVey, who was covering another portfolio at  
24 that time, to step into that and then I was offered to  
25 take on -- there was nobody really supporting Richard  
26 at that time and they invited me to another role.

10:54

10:54

10:54

27 46 Q. Let's just get a snapshot of what's involved with your  
28 Assistant Director's role as you set it out in your  
29 statement. If we go back to WIT-23433. And

1           you describe the key functions. We're going to spend  
2           a lot of time this morning focusing on what must have  
3           been one small element of your job. So help us in  
4           terms of what your role was on a day-to-day basis,  
5           working to the Medical Director, Dr. Wright?

10:55

6           A. Well, as you can see there, there was what I would term  
7           as four main portfolios of work, with a fifth which  
8           wasn't kind of actually in my job description. In  
9           terms of medical education, I had responsibility for  
10          undergraduate and post-graduate education across both  
11          site, Craigavon and Daisy Hill with a team on both  
12          sites. We had to deliver, we had a contract with the  
13          Department of Health held on behalf of Queen's to  
14          deliver undergraduate education to medical students.  
15          Then we have a close relationship with NIMDTA, the  
16          Northern Ireland Medical Dental and Training Agency to  
17          deliver high-level training to doctors in training on  
18          both sites.

10:56

10:56

19  
20          With re-validation and appraisal, that was support for  
21          doctors going through the appraisal and revalidation  
22          process.

10:56

23  
24          Research and Development was fairly straightforward.  
25          We have quite a strong research and development  
26          function within the Southern Trust, particularly within  
27          cardiology, but more recently within neurology and  
28          respiratory, and we have been supporting that. We have  
29          been keen to expand that and have been doing so in

10:56

1 recent years.

2  
3 Then Emergency, Planning, and Business Continuity, it  
4 is a corporate role ensuring that the organisation is  
5 ready for major incidents or issues such as the 10:57  
6 pandemic. Then the last one is the one we discussed  
7 which isn't formally in my job description, but I put  
8 it as a bullet point there because it was something in  
9 the first years when Richard was kind of on his own,  
10 he didn't have the three deputy Medical Directors that 10:57  
11 now exist in terms of supporting doctors in difficulty.

12 47 Q. You refer to your job description, the formal job  
13 description?

14 A. Yes.

15 48 Q. I don't propose opening it but for, the Inquiry's note, 10:57  
16 it can be found sat WIT-23501. As you say, supporting  
17 doctors in difficulty isn't to be found as an item in  
18 what is, you know, a fairly comprehensive, formal job  
19 description, but you found within a short time of  
20 starting within this role that this aspect, that last 10:58  
21 bullet, supporting doctors in difficulty, became  
22 a feature of your role.

23 A. Absolutely, yes.

24 49 Q. As we shall see, the request from Dr. Wright that you  
25 complete a screening report in respect of Dr. O'Brien 10:58  
26 falls into that category, doesn't it?

27 A. It does, indeed. Yes.

28 50 Q. In terms of whether you felt yourself well equipped to  
29 take on the role of supporting doctors in difficulty,

1 and all of the strands that flow from that, the Trust  
2 had a set of guidelines for handling concerns about  
3 doctors' performance that were introduced in 2010.  
4 There were, from 2005, the MHPS Framework. Let me just  
5 focus on those for a moment.

10:59

6  
7 In terms of the local guidelines, how familiar were you  
8 with those at the time when you became involved with  
9 assisting Dr. Wright in the context of Mr. O'Brien's  
10 practice?

10:59

11 A. I was aware they existed. I wouldn't claim to know  
12 them in great detail.

13 51 Q. How does it become a situation that you're aware of  
14 them but don't know them in detail? How does that  
15 arise?

11:00

16 A. I think it was just a question of -- you know,  
17 I started in April. I had been involved in supporting  
18 doctors in difficulties in a number of different ways  
19 and it was maybe through that that I'd learnt some of  
20 the basics.

11:00

21 52 Q. By the time of August 2016, screening report and all of  
22 that, is it fair to say you didn't have a detailed  
23 working knowledge of the guidelines?

24 A. I think that's a fair comment, yes.

25 53 Q. The MHPS Framework introduced in 2005, you've held  
26 a number of AD roles. In terms of that framework, had  
27 it come across your desk in a practical working sense  
28 prior to 2016?

11:00

29 A. No.

1 54 Q. Were you aware of their existence, the framework?  
2 A. Not before 2000 -- when I joined the medical records  
3 office in 2016 I became aware. I went on a case  
4 manager's course on 13th August just to really improve  
5 my learning and understanding of it. 11:01

6 55 Q. We can see, if we can bring it up on the screen,  
7 WIT-33974. This is your certificate of attendance at  
8 a case manager training workshop delivered by NCAS.  
9 Just scroll down. It took place on 30th August '16.  
10 If we look at WIT-18500, please? This is -- let me 11:02  
11 check to be sure. This is the MHPS Framework and it  
12 defines certain roles.  
13  
14 "Case manager is the individual who will lead the  
15 formal investigation. The Medical Director will 11:03  
16 normally act as the case manager but he or she may  
17 delegate this role to a senior medically qualified  
18 manager in appropriate cases."  
19  
20 You're not medically qualified. You're attending case 11:03  
21 manager training with NCAS in the context of MHPS. Why  
22 were you being sent or why did you agree to go to case  
23 management training?  
24 A. I think it was simply to get a detailed understanding  
25 for my own benefit. I was aware that I would never be 11:03  
26 given the role of a case manager, but just to have  
27 support from the Medical Director's office in having  
28 a good understanding of the elements of it.

29 56 Q. I think you've told us in your statement that

1 subsequently, in 2017, you participated in case  
2 investigator training in the context of MHPS?

3 A. That's correct.

4 57 Q. Again, the case investigator is normally medically  
5 qualified, at least for the purposes of the definitions 11:04  
6 within MHPS?

7 A. That's correct. Yes.

8 58 Q. Again, was this attendance at training to obtain  
9 a better awareness of the role of the investigator?

10 A. That's correct. Yes. 11:04

11 59 Q. When you came into the role in the Medical Director's  
12 office there had been a very recent development in  
13 association with Mr. O'Brien's practice. On 30th March  
14 he had met with Martina Corrigan and Eamon Mackle and  
15 had been handed a letter dated 23rd March. If we can 11:05  
16 just bring that up on the screen, 23rd March 2016. It  
17 is to be found at AOB-00979. That's the letter. The  
18 process before your time, the Inquiry has been told,  
19 was that Dr. Wright had spoken to Mr. Mackle and it had  
20 been agreed that Mr. Mackle would meet with Mr. O'Brien 11:05  
21 and deliver a letter setting out a requirement to  
22 deliver a plan to improve on certain aspects of his  
23 practice.

24

25 First of all, did you see this letter at any time when 11:06  
26 you came to the Medical Director's office?

27 A. I certainly didn't see it when I started. I can't  
28 recall if I saw it in the period of, you know, August  
29 to September. I've obviously seen it many times since.

1 60 Q. In terms, then, then of starting this job in April, was  
2 Mr. O'Brien it on your radar? Was this issue of the  
3 need for him to compose a plan brought to your  
4 attention?

5 A. In April, no.

11:07

6 61 Q. At any time before August?

7 A. No. The first was following Richard's e-mail to  
8 Martina, then Martina's response on, I think it was 17  
9 August, that was the first time that Richard kind of  
10 briefed me on it.

11:07

11 62 Q. Okay. So let's just pull up the e-mail that you refer  
12 to. TRU-274723. So at the bottom of the page, then  
13 we'll scroll up. So 9 August 2016, you have been in  
14 post since April:

15

11:07

16 "Hi Martina, did we ever make progress with regard to  
17 the issues raised re urology which Eamon...".

18

19 That is Eamon Mackle:

20

11:08

21 "...had been dealing with? Regards Richard."

22

23 So that is Richard Wright asking Martina Corrigan, Head  
24 of Service, what has been happening since March  
25 essentially.

11:08

26 A. Mm-hmm.

27 63 Q. In the period between you taking up your role in April  
28 and August, were you aware at any time that this issue  
29 was on the agenda or was being thought about or being

1 tracked?

2 A. I don't recall. No.

3 64 Q. In terms of your working relationship with  
4 Dr. Wright -- I don't wish to sound rude or pejorative,  
5 but were you his right-hand man or did he have other 11:09  
6 staff of your seniority working to him?

7 A. There was -- I think there was an AD on the governance  
8 side of the house, but in terms of the medical  
9 education, medical work for his side of the house, yes,  
10 I was his sidekick. 11:09

11 65 Q. So it is fair to say you worked closely with him, in  
12 close physical proximity as well?

13 A. Well, I didn't have an office. My office, actually,  
14 was in Daisy Hill, but, yeah, I mean I did have a very  
15 close working relationship with Richard. I had a key 11:09  
16 to his office and quite often would have sat in there  
17 when he wasn't there, or sometimes when he was there.  
18 I mean no question there is no question that we would  
19 have worked closely together, absolutely, that's the  
20 truth. 11:09

21 66 Q. So this issue didn't come on to your agenda prior to  
22 August. You have no sense of it being on Dr. Wright's  
23 agenda prior to it being raised with you in August. Do  
24 you know why the issue re-ignited for Dr. Wright in  
25 August? 11:10

26 A. Well, my -- I heard his evidence that he just was doing  
27 some tidying-up when he came to it. But I can't give  
28 anything else other than that. I don't know why it  
29 suddenly popped back into his head.

1 67 Q. He, you said, then verbally -- just scrolling down so  
2 we can see Martina's response. There we can. She  
3 wrote back to him and updated the position on triage  
4 review backlog. Scrolling down. And that's how it's  
5 left. 11:11

6 A. Mm-hmm.

7 68 Q. So were these issues then drawn to your attention by  
8 Dr. Wright?

9 A. Yes. So that's -- Richard obviously had a discussion  
10 with me. It must have been the following the day 11:11  
11 because I note that there is a 5 o'clock on the 17th.  
12 So the following day is when he must have come to me  
13 and said I need you to do, well I think what I termed  
14 as a "discrete piece of work". I think I e-mailed  
15 Martina the same day and we meet the following Monday. 11:11

16 69 Q. When you use the word "discrete" in that context, do  
17 you mean a specific or a particular piece of work, or  
18 do you mean a quite confidential, keep this within  
19 a few people, piece of work?

20 A. The latter. 11:11

21 70 Q. The latter. Can I push you on that, what does that  
22 mean? Does that mean Dr. Wright didn't want you to go  
23 all around the houses calling in information?

24 A. That's how I would have described it back to you for  
25 certain, yes. He didn't want me going into the canteen 11:12  
26 and asking everybody for what they knew. It was to be  
27 quite a controlled, discrete piece of information, just  
28 to gather up information with regard to Aidan.

29 71 Q. We'll come to what the work involved in a moment. You

1 ultimately -- or you call it a screening report. Is  
2 that what Dr. Wright asked for, a screening report?

3 A. As I recall he asked me for a screening report. I mean  
4 I have accepted in my statement that I went beyond my  
5 brief in terms of kind of putting in a recommendation 11:12  
6 and I recognise that was a mistake and shouldn't have  
7 been done. But, yes, he was asking for a set of  
8 information.

9 72 Q. Why did it have to be discreet in the sense of seeking  
10 information on the issues from a small number of people 11:13  
11 as opposed to going all around the houses, as I've put  
12 it?

13 A. I don't know. I suppose, I mean, I'd been involved in  
14 various pieces of work with Richard where he's asked me  
15 to have, kind of, discreet discussions. Sometimes it 11:13  
16 would be more kind of pastoral care, if we have  
17 a doctor going through an inquest or litigation or  
18 maybe a GMC issue. Quite often I would have met  
19 doctors on the QT just to see how they were or if it  
20 was involved in maybe a counter fraud case, some of the 11:13  
21 issues are quite sensitive. So I think that's maybe  
22 the context for why he'd asked for it in that way.

23 73 Q. We know you spoke to two people. We'll look at what  
24 they told you in a moment. Martina Corrigan?

25 A. Mm-hmm. 11:14

26 74 Q. You'll maybe have to help me with the other name.

27 A. Pamela Lawson, the health records manager.

28 75 Q. Yes, indeed. But in terms of the narrowness of the  
29 work, is it self-evident then that you didn't go to

1 speak to fellow clinicians or clinical managers?

2 A. No, I did not.

3 76 Q. Was that a deliberate policy informed by what  
4 Dr. Wright told you to do or was that how you  
5 interpreted your brief?

11:14

6 A. I think it was more that I'd seen the e-mail that had  
7 gone between Richard and Martina, and Martina, I knew.  
8 I actually appointed Martina. An incredibly competent  
9 person in terms of the issues that I had been briefed  
10 on. That's why I went to her, because she was best  
11 placed to, kind of, give the detail of that information  
12 that I was looking for.

11:15

13 77 Q. Yes. We'll come to whether that was, I suppose with  
14 hindsight or otherwise, an adequate approach to  
15 a screening report presently. In terms of what you  
16 did, it's clear you spoke to two people, none of whom  
17 were clinicians.

11:15

18 A. Yes.

19 78 Q. You wrote to Martina Corrigan. If we can just pull up  
20 your e-mail to her. TRU-274722. Bottom of the page,  
21 please. This is 18th August. As you've said, you're  
22 getting down to the work the day after, I think it was,  
23 Martina had written to Richard Wright?

11:15

24 A. Yes.

25 79 Q. He has briefed you. Asked you to commence a discreet  
26 piece of work -- you have explained what you meant by  
27 that -- on issues concerned and actions taken to date.  
28 Could you forward relevant information you have on  
29 file, and we can meet for initial discussion next week.

11:16

1 scrolling up the page, she attaches the information  
2 that she had already forwarded to Richard. You did  
3 meet with her; is that right?

4 A. Yes. We met on the 21st at 2 o'clock.

5 80 Q. You also met with --

11:17

6 A. Pamela Lawson. I met her on 5th September. I don't  
7 know whether that was because of leave. I would  
8 imagine, although I have nothing in my calender, but  
9 Martina and I would have met a number of times looking  
10 at the data.

11:17

11 81 Q. On 5 September you finalised your report and sent it to  
12 Dr. Wright?

13 A. I did, I sent it in the afternoon, half-past-two.

14 82 Q. Now, I just want to exam your role and your  
15 understanding of that role in the context of MHPS and  
16 the guidelines, The Trust's local guidelines. If we  
17 could have up on the screen, please, WIT-18501. At  
18 paragraph 15 it talks about -- this is within the  
19 context of an informal approach.

11:17

20  
21 Paragraph 15 says that:

11:18

22  
23 "The first task of the Clinical Manager is to identify  
24 the nature of the problem or concern and to assess the  
25 seriousness of the issue on the information available.  
26 As a first step, preliminary inquiries are essential to  
27 verify or refute the substance and accuracy of any  
28 concerns or complaints.  
29 In addition, it is necessary to decide whether an

11:18

1 informal approach can address the problem, or whether  
2 a formal investigation is needed."

3  
4 Now, within that paragraph, do you recognise any aspect  
5 of the role that you were asked to perform for 11:19  
6 Dr. Wright?

7 A. Yes. I suppose it's the preliminary inquiries, it is  
8 the gathering together of the information, yes.

9 83 Q. And the gathering together of the information, did  
10 you know, as you were sent out to do the job, that it 11:19  
11 was with a view to assisting Dr. Wright to decide on  
12 next steps?

13 A. I can't recall if we had that specific discussion.  
14 I think --

15 84 Q. Or did that come later? Because we know that you were 11:20  
16 asked to set up an oversight group meeting and contact  
17 NCAS, but that comes later?

18 A. Yes. I think by the 5th, so on the 5th I gave him the  
19 report at half-past-two. I was on leave on the 6th.  
20 So we must have had the discussion on the morning of 11:20  
21 the 7th and I made contact with Jill at NCAS some time  
22 before 11:00 a.m. At that time, certainly, yes, but  
23 I don't think when I was originally given the brief.

24 85 Q. If we could move across to The Trust Guidelines.  
25 Sorry, just before we do, you can see the reference in 11:20  
26 the first line to the role of the Clinical Manager, and  
27 we'll come to that in a moment, but it appears from  
28 MHPS that the responsibility for carrying out  
29 preliminary inquiries lies with a clinical manager.

1 A. I'm well aware of that now.

2 86 Q. TRU-83692, please. This is Appendix 1 of the Trust's  
3 guidelines and it describes the screening process. Is  
4 it fair to say that -- we'll come to look at your  
5 report, and it is described as a screening report. It 11:21  
6 is not how you describe it necessarily in your  
7 correspondence with Mrs. Corrigan but it becomes  
8 a screening report. Did you have the guidelines in  
9 mind when you adopted that title and wrote the report  
10 in the way that you did? 11:22

11 A. I probably didn't have that document in mind. I think  
12 maybe it would have come from the fact that I was at  
13 the NCAS training on 30th August and maybe that would  
14 have swayed me in the terms and manner in which  
15 I created the report. 11:22

16 87 Q. The approach here is set out in this flowchart, an  
17 issue of concern whether conduct, health or clinical  
18 performance is raised. It's raised with the relevant  
19 Clinical Manager, and then the Clinical Manager, moving  
20 to the right, or the Operational Director informs the 11:23  
21 Medical Director. That's one route. Another route is  
22 a clinical manager -- going down the page -- and HR  
23 Case Manager undertake preliminary enquiries to  
24 identify the nature of the concerns and assess the  
25 seriousness of the issue. 11:23

26  
27 If we follow that route, the Clinical Manager and HR  
28 Case Manager consult with NCAS and/or Occupational  
29 Health Service for any advice when appropriate. Then

1 the Clinical Manager and HR Case Manager notify the  
2 oversight group of their assessment and decision  
3 underlining those two words, and the decision may be,  
4 and then a list of options, and it is set out, which  
5 includes informal remedial action with assistance, and 11:24  
6 input from NCAS, you would recognise from your own  
7 report.

8  
9 So, again, looking at this flowchart, whatever route is  
10 adopted, the ball for the preliminary inquiry seems to 11:24  
11 be carried by a clinical manager?

12 A. Correct.

13 88 Q. As we can see from the bottom box, it is the clinical  
14 manager with the HR case manager who appears on the  
15 basis of this process to hold the whip hand in terms 11:25  
16 of, they are delivering a decision to the oversight  
17 group. Do you see that?

18 A. Absolutely. Yes.

19 89 Q. By contradistinction with the process that you became  
20 involved in, there are a number of departures, aren't 11:25  
21 there?

22 A. Absolutely.

23 90 Q. You weren't the clinical manager but you were carrying  
24 out the preliminary inquiries of the type described  
25 here, is that fair? 11:25

26 A. That's correct, yes.

27 91 Q. That those preliminary inquiries made it into  
28 a screening report, but you weren't making a decision  
29 or an assessment, as such, you saw that as being the

1 role of the oversight group, is that fair?

2 A. Certainly Richard asked me to gather together the  
3 information.

4 92 Q. First of all, you had training on 30th August with  
5 NCAS. Arising out of that training, were you aware 11:26  
6 that you were tripping over or breaking, if you like,  
7 the rules of the process as set out here? Because you  
8 weren't a Clinical Manager and you weren't in  
9 a position to make a decision?

10 A. Yes. Clearly, I mean, Richard asked me to start the 11:27  
11 piece of work. I commenced the piece of work. I went  
12 to the training on the 30th and then finished off.  
13 I mean clearly it is easy to see from the training  
14 I was on on the 30th that I shouldn't have picked up  
15 the piece of work in the first place. Yes. 11:27

16 93 Q. Maybe we can just formally bring this to the screen.  
17 WIT-33938. At paragraph 29.2 you say that:

18  
19 "On reflection, I do recognise that the screening of  
20 concern stage should have been undertaken by the 11:27  
21 Clinical Manager rather than myself."

22  
23 And that your actions were outside the agreed  
24 guidelines. You undertook the screening of concern as  
25 the Medical Director directly asked you to. You say 11:28  
26 you felt confident in being able to summarise the  
27 issues. Scrolling up. Scrolling down. Top of the  
28 page, please. Given that they were administrative in  
29 nature, but again, recognising that this was not

1 following the correct procedure.

2  
3 Do you have an understanding, did you have an  
4 understanding at the time as to why Dr. Wright asked  
5 you to do this job? 11:28

6 A. why he asked me? Only that he had asked me to do  
7 previous pieces of work with doctors in difficulty.  
8 That's the only reason I could give.

9 94 Q. To be clear, had you ever done a preliminary piece of  
10 work within the context of what was to become -- and 11:29  
11 we'll see it at the oversight group meeting on  
12 13th September -- an MHPS process?

13 A. No, not before that. No.

14 95 Q. Yes. I'm asking you the question in terms of 11:29  
15 Dr. Wright's decision to ask you to do it. It appears,  
16 from the guidelines, that Case Managers, or a Clinical  
17 Manager should have been doing this work. Do  
18 you understand, or did you have an understanding at the  
19 time, as to why a Clinical Manager was not asked to do  
20 the work? 11:29

21 A. No.

22 96 Q. Had you ever turned out a screening report before?

23 A. No.

24 97 Q. Did you receive any advice or instruction on what it  
25 should entail, or were you simply invited to gather up 11:30  
26 the concerns?

27 A. Gather up the concerns, yes.

28 98 Q. If we look at your statement again, WIT-23463. You  
29 assist the Inquiry by saying at 48.2 that:

1  
2 "A screening report was completed to risk assess  
3 through quantification of the impact of the concerns."  
4

5 Can you help us in terms of what you mean by that? 11:31

6 what was being risk assessed? who was doing the risk  
7 assessing?

8 A. I was giving the information in the screening report to  
9 Richard to allow him to do the risk assessment.

10 I wouldn't have been in a position to consider an 11:31  
11 assessment of the risks as I'm not clinically  
12 qualified.

13 99 Q. Those words about "risk assessing through  
14 quantification of the impact of the concerns", where do  
15 they originate from? 11:32

16 A. I'm sorry, I don't know what you mean?

17 100 Q. who has provided that formula of words? Maybe, just to  
18 be clear, maybe I'm not being clear, I see you're  
19 puzzled. You say that the screening report was to  
20 provide or to be completed to risk assess through the 11:32  
21 quantification of the impact of the concerns. Is that  
22 your understanding of the task that you performed, or  
23 is it your understanding of what the screening report  
24 that you produced would enable others to do?

25 A. Yeah, I think it's the latter. I think it was really 11:33  
26 just the quantification of the concerns and it was for  
27 others to consider the impact and the risk assessment.  
28 I was merely, kind of, gathering the data, in essence.

29 101 Q. Just briefly stepping through how you conducted your

1 work. As you said, you met with Martina and you met  
2 with Pamela Lawson?

3 A. Pamela, yes.

4 102 Q. You also wrote to Mr. Mackle, Mr. McAllister,  
5 Mr. Carroll and Mrs. Trouton. That was for the purpose 11:33  
6 of asking them whether they had heard or received any  
7 plans or proposals from Mr. O'Brien since he received  
8 the letter in March; isn't that right?

9 A. That's correct.

10 103 Q. Each of them told you that they hadn't received 11:34  
11 anything?

12 A. That's correct.

13 104 Q. In terms of Mr. McAllister and Mr. Weir, the Inquiry  
14 knows that at that time in August of 2016, they had  
15 been involved in discussions concerning Mr. O'Brien. 11:34  
16 If you just pull up on to the screen TRU-281130,  
17 please. At the bottom of the page you have written  
18 22nd August asking had anybody heard anything from the  
19 23rd March letter. Scrolling up the page. Marked  
20 "strictly in confidence", between Mr. McAllister and 11:35  
21 Mr. Weir. Mr. McAllister saying:

22

23 "Please see below. This has come to light subsequent  
24 to our discussions on this subject last Thursday. It  
25 appears that the boat is missed. I know that you are 11:36  
26 on leave this week and I'm off for the following two,  
27 so I won't get a chance to meet or discuss. Please  
28 hold off on attempting to address this issue until the  
29 dust settles on the process below."

Did you know that Mr. McAllister and Mr. Weir were engaged in discussions on how the Aidan O'Brien concerns might be addressed when you wrote to them?

A. No.

11:36

105 Q. Are you surprised that when Mr. McAllister wrote back to you to say he hadn't heard anything from Mr. O'Brien, that he didn't tell you that there was a process in train, even an informal process between himself and Mr. Weir?

11:36

A. I listened to Charlie's evidence yesterday and I know what he said in terms of, I didn't ask him, so he didn't say.

106 Q. I couldn't hear you?

A. Sorry, I listened to Charlie's evidence yesterday and Charlie said he didn't tell me because I didn't ask him. My request was more straightforward. I suppose he's technically right, but...

11:37

107 Q. How could you ask him what you didn't know?

A. Quite. Yeah.

11:37

108 Q. In the context where you were plainly indicating on behalf of the Medical Director that you had a job to do, should you have been told that clinical management were discussing how they might address the concerns associated with Mr. O'Brien?

11:37

A. If I had of been told it would have been, I wouldn't have been surprised if I was told. It would have been a natural thing to have been said, yeah. I wouldn't have been surprised at that, yes.

1 109 Q. The report itself can be found at TRU-251423. As I've  
2 said earlier, it's called a screening report. And  
3 you set out the context. The report provides  
4 background detail on current status of the issues and  
5 provides a recommendation for consideration of the 11:38  
6 Oversight Committee. Let's look at some of the detail.  
7 The first issue is un-triaged outpatient referral  
8 letters. Scrolling down please until we see the whole  
9 of that paragraph there. Just stop there, thank you.  
10  
11 So at March 16th there were 253 un-triaged letters, no  
12 plans received, and there were now slightly less,  
13 perhaps substantially less, 174 un-triaged letters, but  
14 some were dating back 18 weeks. Was that a problem  
15 from your perspective? 11:39  
16 A. Yes. I could see that would be a problem, yes.  
17 110 Q. Did you have a sense thinking back to 2009 and what you  
18 knew about triage that the problem that you knew then  
19 was essentially the same problem only worse in the  
20 sense of greater volume? 11:39  
21 A. Well, it was worse in two senses: One, it was  
22 a greater volume, but, two, when I was dealing with  
23 Aidan it was delayed triage, not un-triaged. So the  
24 kind of gravity of the situation was a quantum greater.  
25 Because when I would have been going up to him he would 11:40  
26 have said to me, well I would say would have said to  
27 him, would you help us out here and get these ones  
28 done? He would say yes, okay, and he would have done  
29 it. So we never would have got to the sense of being

1 un-triaged. That would never have been an issue when  
2 I was managing him.

3 111 Q. The information for this came to you from Mrs. Corrigan  
4 presumably?

5 A. Yes. So in terms of all this information, when I set 11:40  
6 this out I tried to start off with the data from the  
7 March 16th letter to give context for the report. And  
8 then when I was working with Martina, in that period  
9 between the 21st and when I submitted the report on 5  
10 September, it would have been for updating information, 11:40  
11 she would have been running reports I am sure to gather  
12 information together and QA it.

13 112 Q. Were you able, when speaking to her, to get a sense of  
14 how this issue had been managed over the six,  
15 seven years since you last had direct managerial 11:41  
16 knowledge of it?

17 A. I mean, I don't recall having that discussion directly  
18 with her in that period between, kind of, the 21st and  
19 the 25th, but I would have known, as others did, that  
20 it was an historical issue with regard to Aidan. It 11:41  
21 had been a periodic challenge that had ebbed and  
22 flowed.

23 113 Q. Was it your sense that it had always been challenged  
24 informally, if challenge is the right word?

25 A. Yes. 11:41

26 114 Q. Did you have a view as to the efficacy of informal  
27 challenge?

28 A. The problem existed for years, so, you know, I think  
29 there was always going to come a point where the

1           efficacious nature was deemed ineffective, yes.

2   115   Q.   Issue 2, outpatient review backlog. Here you report  
3           667 patients in his outpatient review backlog dating to  
4           2014. You say that whilst outpatient review backlogs  
5           exist with his urological colleagues, the extent and  
6           depth of these is not as concerning.

11:42

7  
8           Is this, again -- is this a volume issue when you are  
9           comparing with colleagues or why do you say it is not  
10          concerning when it comes to them?

11:42

11         A.   It's a volume issue. I think that, in fairness to  
12           Aidan, I think that Michael's, as was referenced  
13           yesterday, I think Michael Young's review backlogs were  
14           quite high. I don't think Aidan was on his own. It  
15           other specialists they were. In terms of extent and  
16           depth, the extent is it how far they go back and the  
17           depth is how many of them go back that far. You might  
18           have somebody that has gone back to 2014, maybe one or  
19           two, then the next one might be 2016 or 2015, in  
20           between. You might have somebody that has hundreds in  
21           2014. That's what I was trying to allude to there in  
22           terms of the extent and depth.

11:43

11:43

23   116   Q.   Notes at home, I can see what you say there. The  
24           problem being that if they're at home they may not be  
25           available for a patient attending, making the  
26           consultation difficult.

11:43

27  
28           Scrolling down, please

29           The Trust had a practice of recording, using the

1 incident reporting system when a chart wasn't  
2 available. When you were looking at this in 2016, that  
3 formal method of registering the concern had  
4 stopped; is that right?

5 A. That's correct.

11:44

6 117 Q. Did you gain an understanding of why it had started as  
7 a practice and the rationale for that, and why it had  
8 stopped as a recording practice?

9 A. In terms of the rationale for why it started, yes,

10 I was aware of that in terms of -- to give an example  
11 that I was made aware of back at that time -- was it  
12 was a patient going to see a gynaecologist, and

11:44

13 he didn't have a set of notes in front of him, so he  
14 was starting with a blank piece of paper, the concern

15 being if he had the patient's notes that were with

11:44

16 Aidan, he or she may have taken a different course of  
17 action if they had the full set of notes. Obviously,  
18 it's of less relevance now within IECR but as that was  
19 developing, that period, I think there was still an  
20 issue that there was some concern that maybe previous  
21 history of the patient's clinical management plans may  
22 have been missed.

11:45

23  
24 In terms of your second question, in terms of why it  
25 was stopped, in terms of putting it in the IR reporting  
26 system I don't recall.

11:45

27 118 Q. Issue 4 then was the recording of outcomes from  
28 consultants and in-patient discharges. This was not  
29 always being done, or not done quickly enough, is that

1 fair, by Mr. O'Brien?

2 A. Yes.

3 119 Q. But you were not able to quantify that because no  
4 formal audit had yet been performed?

5 A. That's correct. 11:46

6 120 Q. Now, you then proceed to summarise the concerns using  
7 the Good Medical Practice Code of the General Medical  
8 council. You set that out and you offer the following  
9 conclusion that:  
10 11:46

11 "The report recognises the previous informal attempts  
12 to alter Dr. O'Brien's behaviour have been  
13 unsuccessful. Therefore, this report recommends  
14 consideration of an NCAS supported external assessment  
15 of Dr. O'Brien's practice, with Terms of Reference 11:46  
16 centred on whether his current organisational practice  
17 may lead to patients coming to harm."  
18

19 First of all, you seem to be suggesting that based on  
20 your research, informal approaches to these issues had 11:46  
21 not been successful and it was necessary to try a more  
22 formal approach?

23 A. That's correct.

24 121 Q. And you considered that the more formal approach was an  
25 external assessment of his organisational practice with 11:47  
26 Terms of Reference focusing on whether those  
27 shortcomings would lead to patients coming to harm?

28 A. That's correct.

29 122 Q. Now, can you recall what Dr. Wright response to the

1 report was at the time?

2 A. I can't, is the honest answer. I know, as I said  
3 earlier, I gave it to him. I e-mailed him on the  
4 afternoon of the 5th. I was on leave on the 6th.  
5 I know that I was in Craigavon on the 7th because I had 11:47  
6 a meeting with junior doctors that lunchtime. I would  
7 have perched on a desk somewhere in the Trust's  
8 Headquarters, possibly in Richard's office itself, and  
9 we would have had that discussion, but I don't recall  
10 what his comments were, no. 11:48

11 123 Q. In terms of that recommendation, was it ever discussed?

12 A. I don't recall. All I recall is Richard asking me to  
13 make contact with NCAS on the 7th.

14 124 Q. Yes. Certainly that recommendation was never taken  
15 forward? 11:48

16 A. No.

17 125 Q. You have said, and turning to what Dr. Wright said in  
18 evidence, which seems to marry with what you have said,  
19 that in terms this recommendation was, in essence, you  
20 over-extending your role, going beyond your remit seems 11:49  
21 to be the agreed position between yourself and  
22 Dr. Wright.

23  
24 I've shown you already the table, the flowchart headed  
25 "Screening Process" leading to the need to make 11:49  
26 a decision which could have, amongst the options, have  
27 included an external NCAS process. When you think  
28 about this now, the mild criticism attached to your  
29 recommendation, the suggestion that you've overreached

1           yourself by Dr. Wright, what was a screening report  
2           within the context of the guidelines and MHPS to do if  
3           it wasn't to produce a decision or a direction, such as  
4           you included?

5           A.    I would agree.

11:50

6   126   Q.    When you reflect now, was there an confusion on the  
7           part of yourself or Dr. Wright in terms of a proper  
8           understanding of this process?

9           A.    Yes, I would agree with that, yes.  Certainly I think  
10          there was confusion from both of us, yes.

11:50

11   127   Q.    In terms of your drafting of the report, the Inquiry is  
12          aware that there are two versions of it.  I just want  
13          to ask you about that.  Let me just scroll down  
14          a minute, please.

15  
16          The version that we are working with would appear to be  
17          the version which was shared with Dr. Wright, Mrs. Toal  
18          and Mrs. Gishkori, who make up the Oversight Group.  If  
19          we could turn to WIT-23734.  Just go to the bottom of  
20          the page, "Summary of Concerns", then on down, please,  
21          "Conclusion".  You can see that this version has the  
22          added sentence:

11:51

23  
24          "The options available for this external assessment are  
25          provided in Appendix A".

11:52

26  
27          Then you set out Appendix A, which is a description of  
28          the various assessment services or types of assessment  
29          that NCAS could carry out.  Now we find that version

1 attached to your Section 21 statement. Can you help us  
2 at all in terms of why the version, with the appendix,  
3 was created by you and, in turn, why it does not appear  
4 to have been sent to members of the Oversight Group?

5 A. I think, if you scroll up slightly, you will that it is 11:53  
6 dated 7th September, at the bottom of the page before.

7 128 Q. Yes.

8 A. I think what's happened there is that I've had a  
9 discussion with Colin and then, subsequent to that,  
10 I've added in that. But maybe, this is conjecture, 11:53  
11 reflected that this was really overstepping the mark,  
12 so it never went anywhere. That's the only logical  
13 thing I can think of.

14 129 Q. Did anybody tell you at the time that you were  
15 overstepping the mark? 11:54

16 A. No.

17 130 Q. It's conjecture, what you've just said.

18 A. Yes.

19 131 Q. Again, to the best of your knowledge, the suggestion of  
20 an NCAS-regulated assessment wasn't discussed. You 11:54  
21 have no recollection of it being discussed, even at the  
22 Oversight Group?

23 A. No.

24 MR. WOLFE KC: It is ten-to-twelve. I have plenty to  
25 get through but I think, in ease of everybody, a short 11:54  
26 break, maybe, to 12 o'clock?

27 CHAIR: According to the clock in the chamber it is  
28 almost five-to. So let's say ten-past-twelve.

29 MR. WOLFE KC: Very well.

1  
2 THE HEARING ADJOURNED BRIEFLY AND RESUMED AS FOLLOWS:

3  
4 CHAIR: Mr. wolfe.

5  
6 132 Q. MR. WOLFE KC: Mr. Gibson, if we could have up on the  
7 screen, please, WIT-33922. Before the break we looked  
8 at your screening report and what became of your  
9 screening report. You explain at paragraph 13.1:

10  
11 "When I completed the screening report on 5th September  
12 I discussed this report informally with Dr. Wright as  
13 Medical Director who wished to convene an Oversight  
14 Committee to formally consider this screening report  
15 and determine the next steps. The date for this  
16 Oversight Committee was set for 12th September 2016.  
17 To assist the consideration of the Oversight Committee,  
18 Dr. Wright requested I seek the advice of NCAS, which  
19 I did by telephone on the same day."

20  
21 You informally discussed the report. Can you remember  
22 anything about that?

23 A. No, I can't.

24 133 Q. The fact that you were sent in the direction of NCAS  
25 for further advice and the fact that Dr. Wright thought  
26 that an Oversight Committee should be arranged for the  
27 12th, it was to become 13th September, does that  
28 suggest that between you and Dr. Wright you thought  
29 that the concerns exhibited in your report were

1 sufficiently serious to merit further action?

2 A. I can't say. That would have been Dr. Wright's  
3 decision.

4 134 Q. And he didn't articulate that to you?

5 A. I can't recall. 12:12

6 135 Q. You contacted NCAS that day?

7 A. That's correct.

8 136 Q. Had you previously had cause to contact NCAS to seek  
9 advice?

10 A. No. 12:12

11 137 Q. This was your first time in contact with that  
12 organisation?

13 A. In terms of in contact with the organisation, no.  
14 Obviously I had been at the training, but in relation  
15 to a doctor, that's correct, yes. 12:13

16 138 Q. What was your understanding of what they could tell you  
17 or advise you? You're doing this for the first time.  
18 Dr. Wright has told you, go and seek advice. What did  
19 you contemplate that might have meant?

20 A. I was aware of what NCAS can offer because I had been 12:13  
21 at the training course. In terms of what it might  
22 mean, or the phone call that I had with Colin on the  
23 7th, I had no preconceived ideas of how it would go.

24 139 Q. In terms of advice, what advice were you seeking?

25 A. I suppose the question would have been advice on 12:13  
26 managing Aidan.

27 140 Q. It was fairly open-ended?

28 A. Yes. It was to seek advice. Yes.

29 141 Q. Dr. Wright, in his witness statement, recalls

1 communication at that time from Mr. Haynes, that's in  
2 or about September, early September 2016, and that this  
3 was his prompt to ask you to contact NCAS and to  
4 arrange an oversight meeting. Did Dr. Wright discuss  
5 with you his communication with Mr. Haynes?

12:14

6 A. I don't believe so. No.

7 142 Q. If we can just look, then, at the discussions that  
8 you have with NCAS. WIT-53479. This is an internal  
9 record made by, it appears, somebody called Jill on  
10 7th September, and she's marking it for the attention  
11 of Colin, that's Colin Fitzpatrick. Just referring --  
12 going down slightly. He refers to you as Dr. Simon  
13 Gibson. That's not how you introduce yourself, is it?

12:15

14 A. No.

15 143 Q. We'll ask NCAS about that, but perhaps the assumption  
16 is that people contacting them to seek advice are the  
17 medically qualified clinical managers, generally?

12:15

18 A. Yes, I can understand from Jill's perspective,  
19 certainly that could well be the case. And certainly  
20 Colin would have known that I wasn't a doctor, I would  
21 have worked with Colin in a previous life before the  
22 Trust, so I would have known Colin from years ago and  
23 we obviously were together on the course on 30 August,  
24 and he would have known then that I wasn't clinically  
25 qualified. Whether Jill made an assumption, I just  
26 don't know.

12:16

12:16

27 144 Q. So she records what she describes as the "skeleton  
28 details". You can see the summary of concerns set out  
29 there. Are you content that they broadly accurately

1 reflect what you're saying to them, saying to Jill?

2 A. Yes.

3 145 Q. Before you then presumably had a conversation with  
4 Dr. Fitzpatrick?

5 A. That's correct. 12:16

6 146 Q. When you left that conversation with Dr. Fitzpatrick  
7 did you leave, and I know it was on the telephone, but  
8 did you leave that conversation with a package of  
9 advice that you could bring to the Oversight Committee?

10 A. Yes. I do recall the phone call. Obviously it was the 12:17  
11 first time I had done this so it was kind of -- it did  
12 stick in the mind. I remember having the screening  
13 report beside me as a script to make sure that  
14 I conveyed all the information to Colin. And whilst  
15 I haven't been able to find the diary I physically 12:17  
16 wrote in back in 2016, I would have jotted down the  
17 advice that he gave me following the phone call.

18 147 Q. You refer to having the screening report, of which you  
19 were the author, beside you as you spoke. As an  
20 aide-memoir, presumably? 12:18

21 A. Yes. I didn't speak to it verbatim, that wouldn't be  
22 my style. But certainly I recall knowing that I wanted  
23 to convey accurately the detail of the information that  
24 Richard had asked me to speak to NCAS about, and  
25 I didn't want to miss it by just doing it off the top 12:18  
26 of my head, so I had it beside me and stepped through  
27 it. I think it would appear that that's kind of  
28 reflected in Colin's letter back to me.

29 148 Q. You didn't send them the screening report?

1 A. No. I don't believe so.

2 149 Q. Did you tell them that you were the author?

3 A. I don't believe so. No.

4 150 Q. The letter that you received from Dr. Fitzpatrick,  
5 we can find it at AOB-01049. we'll step through this. 12:19  
6 It is dated 13 September. The Oversight meeting  
7 happened that day at 10 o'clock and you tell us in your  
8 witness statement that this letter wasn't available for  
9 the meeting?

10 A. That's correct. This came in at 16:29, I believe. 12:19

11 151 Q. So Dr. Fitzpatrick reflects that this is a letter he is  
12 writing following the discussion with him on 7  
13 September, between you and him, and he sets out the  
14 background and your description of the problems:  
15 A backlog of 700 review patients. This is different to 12:20  
16 his consultant colleagues who have largely managed to  
17 clear their backlog. Is that accurate in terms of what  
18 you would have said?

19 A. It's a fair representation of the screening report in  
20 which I say similar. I mean it is not word for word, 12:20  
21 but it certainly is not inaccurate.

22 152 Q. You told him that Mr. O'Brien is very slow to triage  
23 referrals, can take him up to 18 weeks, whereas the  
24 standard required is less than two days. Again, is  
25 that an accurate reflection of what you would have 12:20  
26 said?

27 A. Yes.

28 153 Q. You told him that he often takes patient charts home  
29 and does not return them promptly, often leading to

1 patient arriving for appointments with no records  
2 available. Again a fair reflection of what you would  
3 have told him.

4  
5 "You told me that his note taking has been reported as 12:21  
6 very poor and on occasions there are no records of  
7 consultations".

8  
9 Again that's a reflection of what's in the screening  
10 report, so presumably you told him that. 12:21

11 A. That's correct.

12 154 Q. The last paragraph on the report is: to date you are  
13 not aware of any actual patient harm from this  
14 behaviour, but there are anecdotal reports of delayed  
15 referral to oncology. I don't think we find that in 12:21  
16 your screening report, is that fair?

17 A. Yes.

18 155 Q. Again do you think it is fair to say that is something  
19 he must have got from you?

20 A. I do recall having that conversation. I was aware, as 12:22  
21 I have said, that I wanted to keep the conversation as  
22 factual as possible, and as evidence-based, which is  
23 why I was looking at the detail and the data that was  
24 in the screening report. Then he asked me a very  
25 specific question, 'are you aware of any actual patient 12:22  
26 harm?' And I remember -- it's too dramatic to say  
27 I kind of missed a beat, but I was aware of this kind  
28 of delayed referred to oncology, but I didn't have  
29 anything to hand as evidence or a document that could

1 support that. I was aware that, in terms of NCAS, you  
2 have to be as evidence-based, and as fair and as  
3 factual as you can be, and yet I was about to raise  
4 something for which I had no evidence whatsoever, but  
5 I was aware of it. I have to be completely honest, 12:22  
6 I wasn't aware of the IR1 that Mark Haynes raised in,  
7 I think it was late November '15, until his evidence  
8 was presented on Day 10 of this Inquiry. I didn't  
9 think have that to hand and it wasn't provided to me.  
10 The only way I could have got that was through an 12:23  
11 anecdotal discussion as I was gathering up the  
12 information.

13 156 Q. Let me just break that down a little. You, if we take  
14 the words of Dr. Fitzpatrick, you have referred him to  
15 anecdotal reports of delayed referral to Oncology. 12:23  
16 Doing the best that you can, what was the source or  
17 sources of that anecdotal concern or anecdotal report?

18 A. The honest answer is I can't recall. I mean, I had  
19 been working with Martina in that period between 21  
20 August and that date, 7 September. I don't recall 12:24  
21 a conversation with Martina. But I was doing  
22 a discrete piece of work, I wasn't having lots of  
23 conversations with lots of people. The honest answer  
24 to the Panel is I can't recall where that came from.

25 157 Q. It doesn't offer much, or any detail perhaps, in terms 12:24  
26 of the context in which these delayed referrals to  
27 Oncology take place. Again, can you help us to break  
28 that down a little? In what circumstances were delays  
29 to Oncology taking place?

1           A.    It would be unfair of me to rely on what I have  
2                   subsequently learned in the last few days, looking  
3                   at Day 10, because I only just learned that. I have no  
4                   recollection of the detail behind that at that time.

5   158   Q.    You keep referring to Day 10. Mr. Haynes gave evidence 12:25  
6                   on Day 10. He referred, and I'm not sure I'm going to  
7                   be able to remember the name of the patient, but we're  
8                   not going to name the patient out loud in any event,  
9                   we have a cipher list in front of you.

10           A.    Yes. 12:25

11   159   Q.    I have a recollection, and maybe you can help me on  
12                   this, that Mr. Haynes talked about raising an IR1 --

13           A.    That's correct.

14   160   Q.    In respect of a patient?

15           A.    I recall it being Patient 102. 12:25

16   161   Q.    102.

17           A.    But I think from the evidence bundle attached to  
18                   the Day 10 transcript of Mark's evidence, yes.

19   162   Q.    Yes. But that is something, that specific case of  
20                   Patient 102 is not something you would have been aware 12:26  
21                   of as a specific actual case of a problem in respect of  
22                   referring to Oncology when you had this conversation  
23                   with Dr. Fitzpatrick?

24           A.    That's correct. No. I mean the timeline isn't that  
25                   far out. I mean, Mark submitted it in November '15 and 12:26  
26                   it was escalated through the IR1 in December and March  
27                   '16, but I have nothing more than that.

28   163   Q.    Is what you are saying, just so the Inquiry is clear,  
29                   it's conjectural.

1 A. Yes.

2 164 Q. But what you're saying is, in the system at that time,  
3 unbeknownst to you, was this case of Patient 102, who  
4 had not been referred to oncology, and that is a  
5 possible anecdotal, that is possibly the case that was 12:27  
6 drawn to your attention anecdotally without it being  
7 named, is that what you are saying?

8 A. That is what I'm saying, that it is conjecture. I have  
9 nothing I can back it up with. But that is the only  
10 logical place I can come to for that. 12:27

11 165 Q. We've heard from you already that in terms of the  
12 information that you gathered for the purposes of the  
13 screening report, you spoke to two people. One was in  
14 records, the other had, I suppose, a more rounded  
15 understanding of what was going on within urology 12:27  
16 services because she, that is Mrs. Corrigan, was Head  
17 of the service. In terms of the source of these  
18 reports, can you say it is more likely than not that  
19 Mrs. Corrigan would have told you about this?

20 A. I can foresee that being a kind of plausible 12:28  
21 explanation and I can't think of an alternative one  
22 that is as plausible. That's as strong as I can say  
23 it, I'm afraid, apologies to the Panel.

24 166 Q. The fact that it was known, or perhaps to use a lesser  
25 word, suspected, that there were delays in referral to 12:28  
26 oncology, it is, nevertheless, a source of information  
27 or evidence to you, but it didn't make it into your  
28 screening report. Why is that the case?

29 A. I have reflected on that. I think that maybe I was

1 being too literal and too narrow in terms of putting  
2 that report together in terms of making sure it was,  
3 you know, quantifiable evidence that could be backed up  
4 with reports. At the time all I had was maybe  
5 a conversation over coffee. Again, this is conjecture, 12:29  
6 maybe I thought it was not strong enough to put into  
7 the report.

8 167 Q. You clearly didn't keep it to yourself. It's shared  
9 with NCAS and, as we'll see in a moment, the NCAS  
10 advice was shared by you with others on the Oversight 12:30  
11 Group, including Dr. Wright. Have you any memory of  
12 this particular aspect, delayed referral to oncology,  
13 ever arising as a topic of conversation within the  
14 various Oversight Group meetings, of which there were  
15 several? 12:30

16 A. No.

17 168 Q. When you think about it now, albeit that you have  
18 a vague memory of the substance of this, someone  
19 telling you that there are concerns about delayed  
20 referral to oncology surely merited some kind of 12:30  
21 further inquiry, if not formal investigation?

22 A. Yes. I mean I submitted the letter to Richard, as  
23 Medical Director, and to Esther Gishkori, as the Acute  
24 Services Director and I don't know what action was  
25 taken to it after that in relation to that specific 12:31  
26 line.

27 169 Q. We know, for example, that your report, your screening  
28 report, does not make any reference to private patients  
29 and the potential for abuse of the NHS system by

1 prioritising, or taking out of chronological order,  
2 patients who had started as private patients. That  
3 information came into the system, if you like,  
4 anecdotally when Mr. Haynes reported it after the  
5 Oversight Committee meeting in December of 2016, and  
6 yet it found its way into the MHPS Terms of Reference  
7 for the investigation. Yet something potentially much  
8 more serious in terms of Patient Safety is known to  
9 you -- not alone you, obviously others in more senior  
10 positions -- and yet it appears not to have caused an  
11 eyebrow to be raised. Is that a fair way of putting  
12 it?

12:32

12:32

13 A. Yes. I mean, I had forwarded the letter on to Richard  
14 and to Esther, and maybe the blame is mine that  
15 I should also have specifically flagged it when  
16 I forwarded it to them, but I just forwarded the  
17 letter.

12:32

18 170 Q. Just over the next page, please. Dr. Fitzpatrick  
19 then -- top of the page, please. Thank you.

12:33

21 "The doctor has been spoken to on a number of occasions  
22 about this behaviour, but unfortunately no records were  
23 kept of these discussions. He was written to in March  
24 of this year seeking an action plan to remedy these  
25 deficiencies but to date there has been no obvious  
26 improvement."

12:33

27 Again, is that a fair reflection of what you would have  
28 told Dr. Fitzpatrick?

29 A. Yes, because that would have been the issue that

1 I raised in the screening report in relation to the  
2 discussions that Dr. Rankin and Mrs. Burns had had with  
3 him in 2012 and 2014.

4 171 Q. You are setting the issue in its, I suppose in its long  
5 running historical context as opposed to a very recent 12:34  
6 happening.

7 A. Absolutely. Yes.

8 172 Q. You appear to have discussed various options; is that  
9 fair?

10 A. Yes. 12:34

11 173 Q. There is a Trust policy in terms of the removal of  
12 records. Dr. Fitzpatrick saying this doctor appears to  
13 be in breach of the policy. This could lead to  
14 disciplinary action, and that would be open to you, but  
15 he would suggest asking for compliance. Okay. So is 12:34  
16 that information that you would have -- that advice,  
17 was that likely to have been given to you on the  
18 telephone?

19 A. Yes. Whilst I don't recall the specifics, I do recall,  
20 because I knew this was an important phone call, I had 12:35  
21 my diary there and I wrote down the advice he gave me  
22 into a series of bullet points. Yeah, I see the kind  
23 of, the four bullet points, kind of breaking it down,  
24 or summarising the four bullet points of advice that he  
25 gave. That would have formed in essence what I would 12:35  
26 have gone to Richard with and briefed him with  
27 following the phone call.

28 174 Q. So the possible disciplinary action or, in the  
29 alternative, asking for immediate compliance?

1 A. No. For this one here it would have been I would  
2 suggest he is asked to comply immediately with the  
3 policy, so that's what I would have led with.

4 175 Q. Yes. In terms of note taking, he's suggesting an audit  
5 might be useful? 12:35

6 A. Yes.

7 176 Q. Is that something you would have?

8 A. The second one was conducting the audit. The third one  
9 was the meeting. The fourth one was the query of  
10 relieving him of theatre duties. 12:36

11 177 Q. Sorry, say that again?

12 A. The fourth bullet point would have been the possibility  
13 of relieving him of theatre duties, which is the fourth  
14 piece of advice.

15 178 Q. The four were compliance? 12:36

16 A. Bring the notes home, do an audit of his charts, meet  
17 with Aidan to talk about the review patients and the  
18 triage and the possibility of relieving him of theatre  
19 duties.

20 179 Q. Did you appreciate upon leaving this discussion that 12:36  
21 perhaps a key emphasis of Dr. Fitzpatrick is the  
22 significance of Dr. O'Brien's backlog was such that he  
23 would require significant support, as is stated here?

24 A. Yes.

25 180 Q. On 28th September you send this advice to Dr. Wright 12:37  
26 and others. Let me just bring that up on the screen,  
27 please. WIT-41573. If you just highlight that. It is  
28 now 15 days after the Oversight Meeting and you say  
29 that:

1  
2 "You will recall that as part of the collation of  
3 evidence in relation to the above" -- that's  
4 Dr. O'Brien -- "I sought advice from NCAS", which you  
5 say was discussed when the oversight committee met. 12:38

6  
7 "The written advice has come in and is attached.  
8 Whilst the informal work is underway with Dr. O'Brien,  
9 the NCAS advice will be placed on file for reference  
10 should we need it at the end of the informal piece of 12:38  
11 work. "

12  
13 That is sent to Dr. Wright, Dr. McAllister,  
14 Mrs. Gishkori, Emma Stinson.

15 A. Emma was, at the time, Esther Gishkori's PA, and 12:38  
16 Dr McAllister was at that point AMD.

17 181 Q. Associate Medical Director. Was it sent to Mrs. Toal  
18 who was another member of the Oversight Group?

19 A. No, that was an oversight on my part. I didn't even  
20 flag that until she was preparing for the Inquiry, and 12:39  
21 that it was gone to her.

22 182 Q. You refer here to keeping this advice on file pending  
23 the completion of the informal work. We'll come on to  
24 pick up on that in a moment, but that's a reference to  
25 the fact that notwithstanding the Oversight Group's 12:39  
26 decision on 13th September to pursue an MHPS process,  
27 that was overturned and a much more informal approach  
28 was suggested and planned.

29 A. That's correct.

1 183 Q. Yes. Let's get into some of that now. Just before  
2 we do so, can I just share with you some reflections  
3 from Colin Fitzpatrick, Dr. Colin Fitzpatrick who wrote  
4 that letter to you. If we can bring up on the screen,  
5 please, WIT-53790. If we can scroll down to 12:40  
6 paragraph 8. He is obviously reflecting back on the  
7 events of 2016. He says it occurs to him that there  
8 were a number of missed opportunities by the Trust in  
9 connection with Dr. O'Brien's case. He says initially  
10 when Simon Gibson telephoned me on 7th September, 12:40  
11 I recall asking if there were wider concerns with  
12 regards to Dr. O'Brien's capability and I was told that  
13 there were not. My observation is that Simon Gibson  
14 cannot have been fully informed at the time he  
15 contacted me because he finds it difficult to believe 12:41  
16 that there were not prior concerns about capability  
17 before this call took place. "Anecdotally I understand  
18 there are individuals who worked with Dr. O'Brien who  
19 had concerns about his capability for a long time.  
20 I do not have any documentary evidence that these 12:41  
21 concerns were ever raised formally."  
22  
23 Can I have your response to that, please, Mr. Gibson?  
24 A. I don't recall that element of the conversation is the  
25 honest answer. 12:41  
26 184 Q. In what respect? He says he recalls asking you if  
27 there were wider concerns?  
28 A. Yes. I don't recall that discussion about wider  
29 concerns of capability.

1 185 Q. Let's examine that. We can see from your screening  
2 report what your knowledge of the concerns was, and  
3 we can see that in addition to those concerns the  
4 record, i.e. Dr. Fitzpatrick's letter includes the  
5 additional concern, albeit anecdotal, in terms of 12:42  
6 referral to oncology. Did you have notice of any  
7 concerns beyond that?

8 A. Beyond the issues that were in the screening report?

9 186 Q. Yes, and the oncology anecdotal issue?

10 A. Not that I recall, no. 12:42

11 187 Q. Your informant, primarily, for your screening report  
12 was Mrs. Corrigan. Did she share any additional  
13 concerns with you?

14 A. Not that I recall, no.

15 188 Q. In terms of his observation that he finds it difficult 12:43  
16 to believe that there were not prior concerns about  
17 capability before this call took place and that  
18 anecdotally he understands that the concerns about his  
19 capability -- that is Mr. O'Brien's capability --  
20 existed for a long time. Were you putting it across to 12:43  
21 him that the concerns that you were mentioning had  
22 existed for some time?

23 A. Well, yes. I mean I clearly mention the issues that  
24 were going back to 2012 and 2014 and then March 2016.  
25 So, yes, I would have -- that's in the screening report 12:43  
26 and I would have reflected that to Colin, yes.

27 189 Q. He categorises -- and I think deliberately, as we'll  
28 see in a moment -- prior concerns about capability. Do  
29 you understand the word "capability" in this context as

1           opposed to "conduct" for example?

2           A.    You see, I would take that to mean is Aidan capable of  
3                doing a triage of an outpatient? Is he capable of  
4                keeping the charts in the hospital? My observation of  
5                that is that, yes, if you asked Aidan nicely he would 12:44  
6                do the triage. It's not that he wasn't capable of  
7                doing triage, it's just that he wasn't doing it and was  
8                behind in it. To me that's my interpretation of what  
9                "capability" means in this context.

10   190   Q.    Yes. So is it fair to say that based on your knowledge 12:44  
11               of the working practices of Mr. O'Brien, these weren't  
12               capability issues or ability issues, these were  
13               something else?

14           A.    Yes. I think that's a fair summation, yes.

15   191   Q.    What is that something else in your view? 12:45

16           A.    Conduct.

17   192   Q.    We will obviously speak to Dr. Fitzpatrick, but he says  
18                that he understands that capability issues or concerns  
19                had existed for a long time and his date of knowledge  
20                of that will be examined by the Inquiry. Presumably 12:45  
21                he didn't share that with you at the time of the  
22                telephone call?

23           A.    No. I don't recall that, no.

24   193   Q.    If we can scroll down the page a little and go to --  
25                just a moment -- if we scroll down to paragraph 11, 12:45  
26                please. We'll read 11 and 13 together.

27

28                He says that: "Once capability concerns were  
29                identified there needed to be a clear diagnosis of the

1 issues and the scope of an investigation defined. That  
2 is a stage when the Trust might have taken some wider  
3 soundings to be clear it investigated the right  
4 issues".

5  
6 He says: "Upon being informed of a Serious Adverse  
7 Incident and patient harm, I would expect a Medical  
8 Director to carry out a soft investigation in relation  
9 to wider concerns around clinical capability, which  
10 would then inform the terms of reference of any  
11 subsequent investigation. This might be considered as  
12 another missed opportunity."

13  
14  
15 He goes on to say: "The categorisation of the initial  
16 concern can make a significant difference to how a case  
17 progresses, with a distinction between capacity (with  
18 options for assessment and remediation) and conduct  
19 (which can lead to a disciplinary). If Simon Gibson  
20 did not know about any clinical capability concerns in  
21 September 2016, that avenue under the MHPS framework...  
22 effectively disappeared."

23  
24 There's a couple of points in there which I wish to  
25 explore with you but, again, just on the clinical  
26 capacity issues. Dr. Fitzpatrick seems to be  
27 categorising these as capability issues in the context  
28 of Mr. O'Brien and not conduct?

29 A. You mean capability?

1 194 Q. Capabilities, yes.

2 A. Sorry. Yes. Because you mentioned capacity.

3 195 Q. I'm using that interchangeably. But let's stick to  
4 capability, so not to confuse you.

5 A. Thank you.

12:48

6 196 Q. He says that the circumstances that you describe to  
7 him, he seemed to suggest that they are not conduct  
8 issues but capability issues. That's not how you  
9 understood it?

10 A. No.

12:48

11 197 Q. The other issue he addresses is the need for a wider  
12 soundings to ensure that the right issues are  
13 investigated. You accept that as an operational  
14 manager, or non-clinical manager, you were probably  
15 not, at least in terms -- you were definitely not, at  
16 least in terms of the guidelines --

12:49

17 A. Yes.

18 198 Q. -- and the MHPS process, definitely not the right man  
19 for this job.

20

12:49

21 would you accept that a Clinical Manager might have  
22 a better sense of the problems that might exist below  
23 the surface in the practice of their colleagues?

24 A. Yes. Absolutely.

25 199 Q. At no time were you tasked with the job of taking the  
26 investigation wider than the four items that are  
27 reflected in your screening report?

12:49

28 A. No.

29 200 Q. Do you think there was a missed opportunity to look

1 more broadly at Mr. O'Brien's practice in 2016?

2 A. Yes, I do. Yes.

3 201 Q. Why do you say that?

4 A. I think that if they'd followed the letter that was  
5 written subsequent to the Oversight Meeting on 13th 12:50  
6 September, I think that would have provided an  
7 opportunity to look wider, yes.

8 202 Q. That's the letter that you drafted as a result of the  
9 decision taken by the Oversight Committee --

10 A. That's correct. 12:50

11 203 Q. -- on that date, the 13th? We'll look at that shortly.  
12 The Oversight Committee meeting then on the 13th. If  
13 we could bring the record of that up, please. It's at  
14 TRU-0026. This is the minutes. There are several  
15 doctors mentioned in this so we want to be careful. 12:52  
16 13th September meeting, the members of the Oversight  
17 Group were Wright, Toal and Gishkori?

18 A. That's correct.

19 204 Q. You were in attendance with Malcolm Clegg. What was  
20 his role? 12:52

21 A. Malcolm would be one of our medical HR team members,  
22 very good guy. Yes.

23 205 Q. Who drafted the minutes of this meeting?

24 A. Malcolm did those ones.

25 206 Q. Scrolling down to the next page, please? Just take 12:52  
26 a moment to read the minute. The background is set out  
27 of a letter sent to Mr. O'Brien on 23rd March '16. He  
28 was asked to develop a plan. No plan has been provided  
29 and almost six months have elapsed. A preliminary

1 investigation has already taken place on paper. Is  
2 that a reference to your screening report?

3 A. I assume it must be, yes.

4 207 Q. In view of this, the following steps were agreed.  
5 Just before we look at the steps, conscious that your 12:53  
6 screening report made a particular recommendation, it  
7 doesn't feature in the minutes. Conscious that you  
8 received oral advice from NCAS, Dr. Fitzpatrick doesn't  
9 feature in the minutes. Is that fair?

10 A. He certainly doesn't. No. 12:54

11 208 Q. I pulled up an email earlier in which you indicated to  
12 Dr. Wright, and others as you sent them a copy of the  
13 NCAS advice, that the advice was discussed by you.  
14 "You will recall that I discussed this advice", I think  
15 was the words? 12:54

16 A. That's correct.

17 209 Q. Did you take this Oversight Committee through the  
18 advice provided by Dr. Fitzpatrick?

19 A. Again, I have to be honest, I have no definite  
20 recollection of doing it, but, in my mind, I had been 12:54  
21 tasked with doing the piece of work over two weeks,  
22 which I'd done. I briefed Richard. He asked me to go  
23 to NCAS. I did that. I came back, I briefed Richard.  
24 Subsequent to that I drafted the letter. The thought  
25 that I would have sat there like a wallflower is 12:54  
26 inconceivable to me. I definitely would have briefed  
27 the committee.

28 210 Q. In fairness to you, I'll make the point, you said in  
29 your email on 28th September "you will recall that

1 I discussed NCAS device".

2 A. Yes.

3 211 Q. Did anybody come back to you and say "oh, no,  
4 you didn't"?

5 A. No. 12:55

6 212 Q. Let's then just work through what was agreed. You were  
7 to draft a letter for Colin Weir and Ronan Carroll to  
8 present to Aidan O'Brien. The meeting with Aidan  
9 O'Brien should take place next week. What should the  
10 letter do? It says here: 12:55

11

12 "The letter should inform Aidan O'Brien of the Trust's  
13 intention to proceed with an informal investigation  
14 under MHPS at this time."

15 12:56

16 Just pausing there, are you confident, when you think  
17 back now, that it was an informal investigation that  
18 was agreed?

19 A. Yes.

20 213 Q. "It should also include action plans with a four-week 12:56  
21 time scale to address the four main areas of his  
22 practice that are causing concern", and you set those  
23 out.

24

25 Again, notable that there is no reference to the 12:56  
26 anecdotal problem of referral to oncology.

27 A. That's correct.

28 214 Q. I think I may have asked you but just for complete  
29 certainty. Have you any recollection of that issue

1           being discussed at this Oversight?

2           A.    No.

3   215   Q.    It goes on to say that Esther Gishkori is to go through  
4           the letter with Colin, Ronan and Simon prior to the  
5           meeting with AOB next week.  What does "go through"           12:57  
6           mean?

7           A.    I assume it means sign it off.  Just QA it and agree it  
8           in terms of consent.

9   216   Q.    Ronan, being Ronan Carroll, her Deputy Director?

10          A.    Ronan Carroll at that time was Assistant Director for           12:57  
11          Surgery and would have had responsibility for Urology  
12          at that time, taking over from Heather on 1st April.

13   217   Q.    Colin, that's Colin Weir, the Clinical Director?

14          A.    That's correct.

15   218   Q.    Then, going on down:   12:57  
16  
17          "Aidan O'Brien should be informed that a formal  
18          investigation may be commenced if sufficient progress  
19          has not been made with the four-week period."  
20  
21   12:57  
22          There's nothing there about assisting Mr. O'Brien to  
23          achieve the goals that you very much wanted him to  
24          achieve, that is coming out of theatre, a suggestion  
25          made by NCAS, coming out the theatre duties or  
26          providing him, I think the words was he had a need for           12:58  
27          extensive support or significant support if he wanted  
28          to achieve this.  
29

1 Can you help us in terms of, first of all, whether the  
2 theatre issue or any other form of support for  
3 Mr. O'Brien would have been discussed at this meeting?

4 A. It would have been because it was one of the issues  
5 that I would have notated following the meeting with 12:58  
6 Colin, so I would have raised it alongside raising the  
7 other issues. Yes.

8 219 Q. Where did that go then in terms of the conclusions that  
9 might have been reached?

10 A. I can't answer that. 12:59

11 220 Q. Indeed, if you think of all of the advice that was set  
12 out by Dr. Fitzpatrick within his letter and which  
13 you carried with you, perhaps in a note, certainly in  
14 your head, and reflected into this meeting, albeit it's  
15 not minuted, did this Oversight Group take on board and 12:59  
16 accept any of the advice provided by NCAS?

17 A. The only observation I could make in terms of the  
18 letter that I drafted the same day was that I think two  
19 of the issues that are characterised in that letter can  
20 be directly mapped back to Colin's letter. We 12:59  
21 subsequently came in on the 13th so, you know, two of  
22 the issues -- in fact three of the issues, but the  
23 theatre issue can't be mapped back.

24 221 Q. Let's look then at the letter at page TRU-251429.  
25 Could I ask your observations on this. One sees and it 13:00  
26 is perhaps notable when in August Dr. Wright briefs you  
27 to carry out your screening report, you immediately  
28 that day, or early the next day, write to  
29 Mrs. Corrigan?

- 1 A. That's correct.
- 2 222 Q. When he asks you to speak to NCAS, you do it either  
3 that day -- if you delivered the report on the 5th, but  
4 certainly you were speaking to NCAS on the 7th?
- 5 A. That's correct. 13:01
- 6 223 Q. You are writing this letter 13th September at  
7 14:12 hours, or distributing it, within a couple of  
8 hours of the meeting concluding, I would assume?
- 9 A. That's correct.
- 10 224 Q. The meeting started at 10:00 a.m. Was there a sense, 13:01  
11 at least from your perspective, of the need to move  
12 through these stages very efficiently?
- 13 A. Absolutely. I really thought this was an opportunity  
14 to finally get Aidan into a firm and formal process, or  
15 informal process. So I was moving at speed to make 13:02  
16 sure that that momentum wasn't lost.
- 17 225 Q. You address the letter to all but, in particular, to  
18 Esther Gishkori saying that -- you're commenting on the  
19 targets you're setting within the letter which we'll  
20 lack at in a moment, the targets that you're setting 13:02  
21 for Mr. O'Brien. You say that they are, in essence,  
22 achievable but ultimately it's her call operationally?
- 23 A. That's correct.
- 24 CHAIR: Was not achievable?
- 25 226 Q. MR. WOLFE KC: Just to put this in context, 229 would 13:03  
26 not be achievable and you're saying we don't want to  
27 see him set with a target that he can't reach?
- 28 A. Yes.
- 29 227 Q. You've reduced that to something you regard as more

1           achievable; is that the right way?

2           A.    Yes. I didn't see any benefit in setting him up to

3               fail, to give him something, which in discussion with

4               Martina who is incredibly knowledgeable in urology in

5               terms of outpatients and what maybe could be done, but   13:03

6               at the same time not letting it have a tail that would

7               last forever.

8   228   Q.    Just before lunch, and we'll deal with it very briefly,

9               the letter you sent then is on the next page. If

10              we scroll down. For whatever reason, it's dated 21st   13:04

11              September.

12           A.    I wrote it on the 13th. The reason I dated it on the

13               21st was the meeting was to take place the week

14               commencing the 19th and there was a period in between

15               time when we were to maybe have a to-ing and fro-ing   13:04

16               just to finalise the letter, and I didn't want the

17               letter to go out predated, so I just put a random date

18               in there. The middle of the week commencing the 19th,

19               to make sure it would be there or thereabouts.

20   229   Q.    Could you help us then as we scroll down to draw out   13:04

21               the advice from NCAS that you say is reflected? Do you

22               want me to pause the letter so you can?

23           A.    Yes. The advice from NCAS related to the four areas.

24               There was the charts at home, which I believe is the

25               next page down, area 3.   13:04

26   230   Q.    Scroll down, please. So the advice from NCAS was

27               either a disciplinary route or tell him to comply

28               immediately?

29           A.    Yes.

1 231 Q. Is that the option you pick?

2 A. It's the option that the Oversight Committee picked.

3 232 Q. Of course. So to be returned within 24 hours?

4 A. Of the date on this letter, yes.

5 233 Q. The second issue was one of audit of the outstanding 13:05  
6 dictations.

7 A. No. I think the audit was in regard to area 4,  
8 recording outcomes of consultations and in-patient  
9 discharges, which is the one that is on the screen  
10 there. 13:05

11 234 Q. okay.

12 A. The second paragraph you can see: "A clinical note  
13 review will be undertaken of 20 sets of notes to assess  
14 your compliance as to this expectation."

15 235 Q. That's forward looking. It is not auditing what has 13:05  
16 fallen down in the past?

17 A. That's correct.

18 236 Q. There's to be a meeting with him, and that's what was  
19 advised by NCAS; is that fair?

20 A. That's what NCAS advised, yes. The letter, which would 13:06  
21 have been presented to Aidan during that week, which  
22 would have indicated areas 1 and 2, which are further  
23 up on that letter there --

24 237 Q. Scroll up the to the top, please?

25 A. The meeting would have been the opportunity to discuss 13:06  
26 those as per NCAS advice.

27 238 Q. Yes. Just scrolling on further up the page to the top.  
28 The idea of an informal MHPS investigation which could  
29 proceed to a formal investigation, that was the

1 decision of the Oversight Committee?

2 A. That's correct.

3 239 Q. Was there any dissent on that decision as it was made  
4 at that meeting?

5 A. I don't recall any, no. 13:07

6 240 Q. Did Mrs. Gishkori contribute to the meeting?

7 A. She was there. I have no recollection of her being  
8 more or less vocal than anybody else.

9 241 Q. Can you help us? Because the NCAS advice to you  
10 doesn't mention an MHPS-type investigation. Where did 13:07  
11 that idea come from?

12 A. From the meeting. From the Oversight Committee.

13 242 Q. Yes, but from who?

14 A. Oh, gosh, I couldn't recall.

15 243 Q. Was there any prior discussion with you about it before 13:07  
16 the meeting?

17 A. No, I don't recall any.

18 244 Q. In terms of assistance or support to Mr. O'Brien, while  
19 the concluding paragraph refers to the availability of,  
20 I think, a counselling service -- 13:08

21 A. Yes.

22 245 Q. -- or something such as that, there's no specific offer  
23 of support to enable him to clear his backlog, for  
24 example?

25 A. That's correct. 13:08

26 246 Q. Does that suggest that while you may have communicated  
27 advice from NCAS on that issue, that that advice was,  
28 for whatever reason, disregarded?

29 A. Well, it's certainly not reflected in the letter.

1 247 Q. That's an answer that really doesn't address the  
2 question. Was it discussed?

3 A. I don't recall.

4 248 Q. If it had been agreed you would have put it in the  
5 letter?

13:08

6 A. Absolutely. That letter was the outworking of what the  
7 discussion of the Panel was.

8 MR. WOLFE KC: Okay, I think we can break for lunch.

9 CHAIR: 2.10, everyone.

10

13:09

11 THE INQUIRY ADJOURNED FOR LUNCH AND RESUMED AS FOLLOWS:

12

13 CHAIR: Good afternoon, everyone.

14 249 Q. MR. WOLFE KC: We finished off this morning,  
15 Mr. Gibson, by looking at the Oversight Committee  
16 meeting and what flowed from that in terms of your  
17 letter.

14:11

18

19 I just want to take you back to something I raised with  
20 you this morning. You said that your screening report  
21 was completed in order to risk assess through  
22 quantification of the impact of the concerns. You go  
23 on in your witness statement at WIT-23463 to say:

14:12

24

25 "I provided the screening report to allow Dr. Wright,  
26 as Medical Director, to consider whether the concerns  
27 may have impacted on patient care and safety."

14:12

28

29 It wasn't your role to do that, that was information

1 for the Medical Director. It doesn't appear from the  
2 record of the Oversight meeting for 13 September that  
3 any discussion of a risk assessment took place nor, for  
4 that matter, was there any particular reference to  
5 patient care and safety.

14:13

6  
7 Can you help us with this, were the four issues that  
8 you identified in your screening report viewed by the  
9 Oversight Group as merely administrative on the one  
10 part, or were patient care and safety issues realised  
11 or considered by the Committee?

14:13

12 A. I can't recall that, to be honest.

13 250 Q. I think it's a fairly fundamental issue.

14 A. Yes.

15 251 Q. What was your own perception?

14:13

16 A. I think, in terms of the charts not being available to  
17 other consultants, I thought that that had some  
18 potential. I think letters not being triaged was  
19 another issue. I listened yesterday to Dr. McAllister  
20 in relation to the outpatient review backlog, he  
21 described it as a red herring and I can see that now.  
22 I don't know what I thought at the time. But,  
23 certainly, Aidan wasn't alone in the outpatient review  
24 backlog being an issue. Certainly Michael had some and  
25 there were some in other specialties as well.

14:14

14:14

26 252 Q. Take the outpatient review backlog: The description of  
27 that problem in the letter sent to Mr. O'Brien on 23  
28 March, dated 23 March, spoke about Mr. O'Brien  
29 maintaining a separate Oncology Waiting List and the

1 absence of validation of the waiting list backlog left  
2 the system, left the Service, not knowing whether  
3 patients were at risk. How is that a red herring?

4 A. I suppose in terms of the context of the way it was  
5 described in the screening report, it wasn't described 14:15  
6 in that way, it was only described in terms of  
7 a numerical value. I do recall seeing that in the  
8 evidence bundle in relation to the list. I wasn't  
9 aware of that in terms of, I didn't see the 23 March  
10 letter. I wouldn't have been aware of that at the 14:15  
11 time.

12 253 Q. You did see the March 23rd letter, did you not?

13 A. Not until later on in the year. I didn't see it in  
14 March.

15 254 Q. Yes, but you saw it before you drafted your screening 14:16  
16 report, surely? I thought you told us this morning you  
17 saw it multiple times?

18 A. Yes, I say I saw it multiple times, but when was the  
19 first time I saw it?

20 255 Q. Why would you not have seen it before drafting your 14:16  
21 screening report? You were in consultation with  
22 Mrs. Corrigan, who I understand had been the primary  
23 draftsman of the letter of 23 March.

24 A. Yes.

25 256 Q. Was she not telling you that there was a significant 14:16  
26 level of concern about this?

27 A. I don't recall the detail of the conversation, I just  
28 recall that we were gathering together the information.

29 257 Q. So in terms of patient risk, you can't remember whether

1 the Oversight Group formed a view on that in September,  
2 but you had a view that some aspects of Mr. O'Brien's  
3 shortcomings, as you saw them, did hold the potential  
4 for patient risk?

5 A. Yes.

14:17

6 258 Q. In terms of clinical involvement in the decision-making  
7 around Oversight, can I just draw your attention to  
8 this. The Trust guidelines set out the role of the  
9 Oversight Group at paragraph 2.5. If I could bring  
10 that up on the screen, please, TRU-83689. And at  
11 paragraph -- top of the page. Scroll up slightly, on  
12 to the bottom of the next page. Thank you.

14:18

13  
14 we'll start with 2.4: "The Clinical Manager will  
15 immediately undertake an initial verification of the  
16 issues raised. The Clinical Manager must seek advice  
17 from the nominated HR case manager...".

14:18

18 we had that this morning.

19 "The Chief Executive will be responsible for appointing  
20 an Oversight Group for the case".

14:19

21 "This will normally comprise of the Medical Director,  
22 the Director of Human Resources and Organisational  
23 Development and the relevant Operational Director."

24  
25 That's what was done.

14:19

26 "The role of the Oversight Group is for quality  
27 assurance purposes and to ensure consistency of  
28 approach in respect of the Trust's handling of  
29 concerns".

1 The decision maker is the Clinical Manager, the  
 2 Oversight Group is there to ensure a consistent  
 3 approach and for quality assurance purposes. That's  
 4 not how it worked in this instance; isn't that right?

5 A. That's correct.

14:19

6 259 Q. The Clinical Managers who were closely connected with  
 7 Urology was Mr. McAllister, he was the Associate  
 8 Medical Director?

9 A. Yes, Charlie.

10 260 Q. Mr. Weir, he was the Clinical Director, both of whom  
 11 had been recently appointed to their roles in the late  
 12 spring of 2016?

14:20

13 A. Yes, that's correct.

14 261 Q. If they were outside the tent in the sense of not being  
 15 brought to Oversight Group or consulted on what the  
 16 Oversight Group was doing, do you consider that that  
 17 has a negative consequence?

14:20

18 A. Yes, I can see how that would be. I think that whilst  
 19 Dr. Wright as Medical Director was medically qualified,  
 20 I think that Dr. McAllister and Mr. Weir would have  
 21 been clinically a lot closer and maybe would have been  
 22 able to give a wider perspective of issues that they  
 23 may have been aware of that I certainly wasn't, or  
 24 maybe others weren't as well. Certainly there would be  
 25 advantages in Colin and Charlie being there, for sure..

14:20

26 262 Q. Yes. The decision was taken by the Oversight Group to  
 27 conduct an informal MHPS investigation. Mrs. Gishkori  
 28 was party to that decision, but you became aware  
 29 shortly after the decision had been taken by Oversight

14:21

1           that a different approach was being contemplated. Can  
2           you tell us how you came to know about that?

3           A. I think I was on leave on the 14th, but I was aware, in  
4           terms of the first bullet point, of the action notes  
5           from the Oversight Committee that I was to draft the 14:22  
6           letter. It must have been the second bullet point.  
7           Then I was to meet with Ronan and Esther and Colin, top  
8           and tail the letter. And given the fact that I was  
9           keen that this would have been done quickly, I then  
10          made contact with, I think it was Mr. Carroll to find 14:22  
11          out about the meeting when I came back on the 15th.  
12          Ronan said the meeting has been cancelled. So I then  
13          went to Emma Stinson, the PA at the time, very  
14          competent, and she said that there had been discussion.  
15          So at that point, and the email trail is there, but 14:22  
16          that's when I went back to Richard and said: Has there  
17          been a change of plan?

18   263   Q. Yes, just look at some of those emails. If we go to  
19           WIT-34101. You're asking is the meeting not  
20           proceeding? 14:23

21          A. Yes. I think further down, maybe where it starts  
22          with...

23   264   Q. With Ronan saying that Esther has cancelled the  
24           meeting?

25          A. Yes. 14:23

26   265   Q. Scroll on.

27          A. So I then check with Mrs. Stinson a couple of hours  
28          later. She would have been involved in the diary.

29   266   Q. The preceding page, 34100. So you communicate with

1 Dr. Wright on this issue and he replies:

2  
3 "Classic Esther about-turn after the meeting. I've  
4 asked her to outline her plans in detail for us to  
5 consider. We haven't agreed to any change yet." 14:24

6  
7 So this is all by word of mouth and email at this  
8 stage?

9 A. Yes.

10 267 Q. Is "classic Esther" a form of words you take any 14:24  
11 particular meaning from?

12 A. Yes. I would have understood what he was meaning by  
13 that.

14 268 Q. Just spell out what your interpretation of it would be?

15 A. Esther. Esther was unique in the Directors that I've 14:24  
16 worked under. She had a way of working which I wasn't  
17 familiar with. She wasn't, maybe, as structured and  
18 she wasn't maybe as involved as others and it wouldn't  
19 have been, in some ways I wasn't surprised you know  
20 that she'd signed-up for something, and then it had 14:25  
21 changed a day or two later.

22 269 Q. It's this about-turn and we'll see what it looked like  
23 in a moment, it seems caused Mrs. Toal to write to  
24 Malcolm Clegg to say:

25  
26 "We're definitely going to need notes going forward if  
27 goalposts keep trying to be changed."

28  
29 I think Minutes were in the offing already, but that

1 seems to be an instruction to make sure that the  
2 decision of 13 September was minuted. Was there  
3 a concern around management at your level and above  
4 that Mrs. Ghiskori couldn't be relied upon to tow the  
5 party line, or tow the decision in the direction that  
6 has been agreed? 14:26

7 A. I think that there was, on occasion, there was levels  
8 of indecision in Esther's decisionmaking and behaviour  
9 at a Director level, yes.

10 270 Q. You write to Dr. Wright the next day, perhaps as 14:26  
11 details around what is in the offing as an alternative  
12 to the Oversight are becoming known. If we turn to  
13 TRU-251434 and you're saying to Dr. Wright Charlie and  
14 Colin must understand the importance of formally  
15 recording the meeting. Presumably a meeting with 14:27  
16 Mr. O'Brien?

17 A. Yes.

18 271 Q. "Providing quantifiable actions" and "agreeing  
19 realistic dates. You say: "Doesn't need 3 months to  
20 return charts -- 5 days is generous". 14:27

21  
22 Can you help us, what was the origin or the trigger for  
23 what you have written there?

24 A. I don't see an email trail where I was provided with  
25 the plan of Colin's and Charlie's. Whether or not it 14:27  
26 was word of mouth with Richard or whether he showed me  
27 an email, but it must have come from a discussion I had  
28 with Richard and I was reflecting back that I had  
29 a level of frustration that we seemed to have Aidan in

1 a place where we wanted him in terms of a nice tight  
2 process that was quantifiable, time bound, falling into  
3 a nice process that, had he followed it, would have  
4 been all done and dusted by 12th October, which was the  
5 date in the letter, and it seemed to be slipping away 14:28  
6 from us. Yes, I think that's a reflection there of my  
7 frustration of what was unfolding before us.

8 272 Q. You plainly thought the alternative that was being put  
9 together was counter-productive and not what it needed?

10 A. It didn't appear to me to be as tight as the letter 14:28  
11 that I drafted on behalf of the Oversight Committee of  
12 13th September. No.

13 273 Q. Were you privy to the fact that Dr. Wright and  
14 Mrs. Gishkori met with the Chief Executive, Mr. Rice,  
15 that day? I'll show you the email. TRU-263685. 14:29  
16 Dr. Wright telling Vivienne Toal:

17  
18 "I had a meeting scheduled with Francis" -- that's  
19 Francis Rice it has been confirmed for us -- "and  
20 Esther this morning and this topic came up. Esther 14:29  
21 agreed in principle to provide the information  
22 requested and to ensure that there was a documented  
23 meeting with Mr. O'Brien outlining the implications of  
24 not getting this sorted within 3 months. Francis was  
25 keen to pursue this under those circumstances but not 14:30  
26 to let it run further than 3 months if still  
27 noncompliant."

28  
29 That would suggest, when you talk in your email about

1 not needing 3 months to return notes, that maybe you  
2 had received a flavour of this, whether orally or by  
3 email?

4 A. Yes. I don't recall this being forwarded to me by  
5 Richard. So whether or not it was a verbal update or 14:30  
6 whether he showed me. But, yes, that would be an  
7 indication of where that may have come from. Yes.

8 274 Q. Was Dr. Wright equally as frustrated with this turn of  
9 events?

10 A. Yes. I think he was. Yes. 14:30

11 275 Q. In terms of I suppose the power dynamics, to be crude,  
12 of the relationships in this context, could Dr. Wright  
13 and Mrs. Toal have stood their ground and said, listen,  
14 this is the decision of the Oversight Group that  
15 you have sent it to, Mrs. Gishkori, now let's get on 14:31  
16 with it?

17 A. I mean that certainly was an option. They could have  
18 done that. And I think, I mean I think Richard had  
19 a very collegiate style as a manager but if, on this  
20 occasion, he had been a bit more dogmatic and said no, 14:31  
21 that was the decision, we're moving on, we're not going  
22 back, I think on this occasion that might have been  
23 a better approach, yes.

24 276 Q. Would such a dogmatic approach have been, nevertheless,  
25 problematic in terms of relationships and, I suppose, 14:31  
26 the need to have co-operation from Clinical Managers or  
27 could he have forced this through?

28 A. I mean, yeah, it might have made things difficult but  
29 I think he certainly could have forced it through.

1 Yes, I mean, I think the Medical Director there would  
 2 have been responsible for that decision and saying, no,  
 3 this is the way it has to be. I think that could have  
 4 been done. Yes.

5 277 Q. Was there, perhaps, a failure to recognise the urgency 14:32  
 6 in the sense of risk-to-patient harm that led Richard  
 7 Wright and perhaps Francis Rice to fail to stand up to  
 8 this development?

9 A. I don't know if I can answer that. I don't know what  
 10 was in Richard's and Francis' mind, unfortunately, when 14:32  
 11 they met with Esther.

12 278 Q. Have you any view on why, let's call it for  
 13 convenience, 'Esther's contrary plan', I know it is  
 14 more than Esther, but just for convenience. Have you  
 15 any explanation as to why that alternative came to 14:33  
 16 supplant the Oversight Group's decision?

17 A. Only from what I read from the emails that Esther wrote  
 18 on, I think it was the 14th and 15th. She was clear  
 19 that she wanted to take this forward. That's her clear  
 20 indication that that's her drive. 14:33

21 279 Q. Did you appreciate that at that time that  
 22 Dr. McAllister and Mr. Weir had been asked to consider  
 23 the circumstances in which Mr. O'Brien had failed to  
 24 triage Patient 93, if you look at the name? First of  
 25 all, do you know about the case of Patient 93? 14:34

26 A. I know about it now in preparing for the Inquiry.  
 27 I don't recall it at the time, no.

28 280 Q. That was a case where Mr. Haynes recognised that there  
 29 was a failure to triage. If triage had taken place the

1 patient might, and perhaps should have been red flagged  
2 to return into the system with, as I understand it,  
3 metastatic disease arising out of a prostate primary?  
4 A. Mm-hmm.  
5 281 Q. That wasn't a case you were aware of at the time? 14:35  
6 A. I don't recall that. No.  
7 282 Q. In terms of the approach that was adopted, the plans  
8 which were made can be seen at TRU-257641. And they  
9 start with Mr. Weir putting something together on the  
10 16th, this is, again, where the three months thing 14:35  
11 comes from. Did you ever see that plan?  
12 A. Only when preparing for the Inquiry. I hadn't seen  
13 that before, no.  
14 283 Q. Do you know if Dr. Wright was ever shown that plan?  
15 A. Gosh, no. I wouldn't know if he was shown that or not. 14:36  
16 284 Q. In terms of your role within the Medical Director's  
17 office in September 2016 and, subsequently, it didn't  
18 come across your desk?  
19 A. No. I don't recall it at all. The reason that  
20 I believe that is because as soon as I, in preparing 14:36  
21 for the Inquiry I compared it with the letter of 13  
22 September to get a sense of how close or how far it was  
23 from what had originally been planned, and that would  
24 have stuck out because it is clear clearly different.  
25 285 Q. Let's just scroll down until we see the end of it. 14:36  
26 Then if we go, and it is amended then by Mr. Carroll,  
27 I'm sure you've seen that. If we go up the page to  
28 TRU-640. Let's just look at that whole section with  
29 the red ink. Just scroll up slightly.

1 when you compared that plan with what Oversight had  
2 agreed and what was referred to in your letter, what  
3 was your reflection?

4 A. I mean, I think, certainly, with the first version,  
5 which was Colin's version, was compared to the 14:37  
6 September 13th letter, quite loose, in my opinion.  
7 It didn't have the quantification, the time scales, the  
8 detail that was required. I think Mr. Carroll, you  
9 know, whilst he was new in this role was very  
10 experienced as an AD, and I think he was attempting to 14:37  
11 put a bit of structure around it, but still, even with  
12 those additions and his kind of attempts to look at  
13 kind of monitoring processes and putting those in  
14 place, it may be still, if you compare it with the  
15 13th, wasn't quite as tight. 14:38

16 286 Q. Thank you for your view on that. The other factor that  
17 you might reflect upon was the absence of any form of  
18 MHPS investigation in this alternative. Why, in  
19 particular, do you think the informal MHPS  
20 investigation was important to the Oversight Group? 14:38  
21 what did that add to the mix?

22 A. I think it gave it a structure and it gave it a  
23 formality in the terms of the seriousness of it, which  
24 I would have assumed wouldn't have missed Aidan in  
25 terms of his understanding of where he was. Whereas 14:39  
26 this was maybe another method of doing what had been  
27 tried in March, in 2014, in 2012, and had been  
28 unsuccessful. I do take onboard what Dr. McAllister  
29 said yesterday that this was a first step and would

- 1 have been worked upon, but as it sat there I think  
 2 having MHPS as an underpinning element of this would  
 3 have maybe focused Aidan's attention.
- 4 287 Q. Does the fact that this comes with the input of  
 5 Clinical Managers rather re-emphasise the point that 14:39  
 6 I was making to you earlier that it's important, and it  
 7 is of course reflected in the MHPS Framework and in the  
 8 Guidelines, to start with the clinical management input  
 9 rather than the other way round?
- 10 A. Yes. If you re-ran this again and you had Colin and 14:40  
 11 Charlie at the beginning, then within the context of  
 12 the MHPS structure, i.e. the way it should be done,  
 13 I think the end product would have been far better than  
 14 anything else that had gone.
- 15 288 Q. Hypothetically, one option or one possibility, might 14:40  
 16 have been that Mr. Weir came into the Oversight Group  
 17 with that plan and the Oversight Group, quality  
 18 assuring it, said no, that's not good enough, that's  
 19 not strong enough?
- 20 A. Yes, yes, that theoretically could have happened, or 14:40  
 21 they could have said it was good, but we need to  
 22 tighten in some of the timescales and quantification  
 23 and the numbers.
- 24 289 Q. Now, conscious that you didn't see that at the time,  
 25 there was another Oversight Group meeting on 14:41  
 26 12 October?
- 27 A. That's correct.
- 28 290 Q. If we could just pull up the minute of that, WIT-33928.  
 29 Sorry, that's your statement. The correct reference is

1 AOB-01079. Scroll down the page, please. The same  
2 people in attendance. It was reported by Mrs. Gishkori  
3 that Mr. O'Brien was going for planned surgery  
4 in November, was likely to be off for a considerable  
5 period. It was noted that Mr. O'Brien had not been 14:42  
6 told of the concerns following the previous Oversight  
7 Committee. It was the noted that a plan was in place  
8 to deal with the range of backlog within Mr. O'Brien's  
9 practice during his absence. Mrs. Gishkori gave an  
10 assurance that when Mr. O'Brien returned from his 14:42  
11 period of sick leave that the administrative practices  
12 identified by the Oversight Committee would formally be  
13 discussed with him, to ensure there was an appropriate  
14 change in behaviour. It was agreed that this would be  
15 kept under review by the Oversight Committee. 14:43

16  
17 Now, you didn't see the revised plan, but you knew that  
18 the Oversight Group's decision had been placed to one  
19 side by the middle of September. Here, we're sitting  
20 on 12 October, four weeks had passed, and there were to 14:43  
21 be another four weeks before Mr. O'Brien goes off for  
22 surgery. Have you any sense at all as to why the  
23 you urgency which you had appeared keen to inject into  
24 the process had completely dissipated?

25 A. I don't know why that has happened. Looking back now 14:43  
26 I'm disappointed because the irony of the fact that the  
27 12 October was the meeting, that was the date at which  
28 the process should have been concluded. But here we  
29 were going on, yet another plan, for weeks and weeks

1 ahead.

2 291 Q. Not to put too fine a point on it, unless there's  
3 evidence that I'm not yet aware of, everything would  
4 appear to have stopped after Mr. Carroll amended the  
5 Colin Weir seven-point plan, or whatever it was?

14:44

6 A. Yes, that's correct.

7 292 Q. Was there no drive from the Medical Director's office  
8 to say, right, Mrs. Gishkori, and your Service, you  
9 have won the battle in a sense with this alternative,  
10 now get on with it and let's see the outcome. Did that  
11 get lost?

14:45

12 A. Well I mean I'm not aware of any communication between  
13 Richard and Esther in terms of trying to move this on  
14 swiftly, so I think that's a fair comment.

15 293 Q. Is it perhaps a sense of, well, we have tried our best,  
16 now it's over to the Service.

14:45

17 A. Well that's where it was sitting at that time. Yes.

18 294 Q. I think Dr. Wright may have suggested -- I'm not sure  
19 if it was conjecture or otherwise, but the man,  
20 Mr. O'Brien, was going into hospital in four weeks.  
21 There's an element of well, we'll leave him alone. Did  
22 that come across in any conversation you were involved  
23 in?

14:45

24 A. No. I do recall that from -- maybe it was reading his  
25 transcripts from Day 23, but at the time I have no  
26 recollection of that, no.

14:46

27 295 Q. Does it appear to you now that when you think of the  
28 informal steps that you became aware of during your  
29 screening investigation that had failed to direct or

1 obtain permanent change, that this was typical of that,  
2 another false dawn?

3 A. Yes. Absolutely.

4 296 Q. Was there any sense that you were aware of people --  
5 and here I mean Mrs. Gishkori, Mr. McAllister, 14:46  
6 Mr. Weir -- running scared of Mr. O'Brien for any  
7 reason?

8 A. No. Well, taking them individually, certainly not  
9 Charlie. Dr. McAllister, I would have held him in high  
10 regard in terms of his ability and his role as an AMD 14:47  
11 and I would have been under no illusion that he would  
12 have been willing to address any issue with any  
13 clinician if it was required of him. I think, from  
14 Colin's evidence yesterday, I think Colin maybe did  
15 have a bit reticence in tackling Aidan and Esther. 14:47  
16 I don't know about Esther.

17 297 Q. Was Mr. O'Brien seen to be closely connected with the  
18 hierarchy within the Trust?

19 A. Everybody knew he had a close relationship with Roberta  
20 Brownlee, yes. 14:47

21 298 Q. But you don't know whether this was a factor in the  
22 behaviour in September or October, to depart from  
23 Oversight?

24 A. It certainly wouldn't have affected Charlie, that's for  
25 certain. I doubt it would have affected Colin. 14:48  
26 whether it affected Esther, I would be less certain.

27 299 Q. Why do you say you'd be less certain in her case?

28 A. Roberta kind of directly appointed her.

29 300 Q. You say in your statement, when reflecting on these

1 events, and we have asked you about the impression you  
 2 have formed about the implementation of MHPS, that your  
 3 primary impression is one of surprise that  
 4 Mrs. Gishkori decided to move away from the decision of  
 5 the Oversight Committee to commence the investigation. 14:48

6  
 7 You say that at WIT-33938, paragraph 28.2. You go on  
 8 to say that Mrs. Gishkori's decision to not follow the  
 9 decision of the Oversight Committee was a missed  
 10 opportunity to manage Mr. O'Brien at the time. Do 14:49  
 11 you wish to add to that in any way?

12 A. Only, I think I feel a sense of personal regret for the  
 13 patients. I'm aware that if we had followed that path  
 14 of having it all done by 12 October, that would have  
 15 included the four patients that subsequently became 14:49  
 16 part of the SAIs, in terms of their delay being until  
 17 January/February. So in terms of the actual impact on  
 18 patient care, that is a huge regret of mine.

19 301 Q. You've reflected already, I think, this morning, that  
 20 standing back and looking at this there was a failure 14:50  
 21 to follow the steps set out, whether you look at MHPS  
 22 itself or the local guidelines and, in particular,  
 23 giving you a role which really didn't belong to an  
 24 operational manager both in terms of the screening  
 25 report and contacting NCAS. They were roles, really, 14:50  
 26 for a medical practitioner. Do you think, in terms of  
 27 your experience of matters subsequently, that the Trust  
 28 has learnt any lessons from this, the way in which this  
 29 process was handled?

1 A. There has certainly been huge improvements. I think  
2 when Dr. O'Kane came in as Medical Director, I think  
3 she saw quite early, in terms of managing doctors in  
4 difficulty, that there needed to be a much more  
5 structured process and she put that in place in 14:51  
6 partnership with Vivienne Toal. I think that has been,  
7 in my experience, much better because of it.

8  
9 So, yes, now I think that Maria saw it almost in  
10 advance of this process of the Inquiry starting because 14:51  
11 I think that the Doctors in Difficulty Oversight Group  
12 commenced, I couldn't say when, but certainly not long  
13 after she came in to post. It was one of a number of  
14 things that she did to bolster. So, yes.

15 302 Q. Mr. O'Brien's performance or conduct as a practitioner, 14:52  
16 his practice, came back on to the radar again formally  
17 for the purposes of the oversight group in December of  
18 2016, and you were asked to arrange a meeting for the  
19 22nd of that month.

20 14:52  
21 If we just turn up the Minute of that please,  
22 TRU-251441. Ronan Carroll is standing in the shoes of  
23 Mrs. Gishkori on this occasion. You're attending.  
24 Mr. Clegg is attending and Tracy Boyce is in  
25 attendance. Now, the prelude to this meeting appears 14:53  
26 to have been a concern raised with Dr. Wright that he  
27 shared with you by email on 21 December. Esther  
28 Gishkori had telephoned him with regard to worrying  
29 developments, as she described it, in connection with

1 Mr. O'Brien and lost notes. You were asked to set up  
2 the meeting. As part of that you were asked to make  
3 contact with Mr. Haynes. Can you recall that?

4 A. I don't recall that at the time. I see it in the  
5 evidence. I don't recall it. 14:54

6 303 Q. He was a Clinical Director but not in a relationship  
7 with Urology per se.

8 A. Yes.

9 304 Q. Why would his input have been considered important, do  
10 you know? 14:54

11 A. I could only speculate that in the absence of Charlie  
12 as AMD, that Richard was looking for somebody that was  
13 a bit closer to the ground than himself, and just maybe  
14 naturally thought of Mark, obviously as an Urologist  
15 whilst he didn't have any managerial responsibility at 14:54  
16 that time for that service that he was next in line and  
17 maybe just sprung into Richard's head. That's all  
18 I can think.

19 305 Q. Mr. McAllister had been required to step aside  
20 in October, I think, or November of that year; isn't 14:55  
21 that right?

22 A. October 13th.

23 306 Q. This meeting, if we scroll down, please, considered  
24 a number of issues which were outlined. Dr. Boyce,  
25 first of all, summarised an ongoing serious adverse 14:55  
26 incident and that was the incident concerning Patient  
27 10; isn't that right?

28 A. Yes.

29 307 Q. If you just scroll up the page for a second to the

1 cover. The context, I should first of all have  
2 referred to that. The second line refers to the 13th,  
3 a formal investigation being recommended at 13  
4 September. Is that right? Was it a formal  
5 investigation or an informal MHPS, certainly if we go 14:56  
6 back to 13 September --

7 A. I think that's a simple typo. I think that's a typo on  
8 my part, it should read "informal".

9 308 Q. To give it its full description "Informal MHPS  
10 Investigation"? 14:56

11 A. Yes.

12 309 Q. Is there any doubt about that?

13 A. No. The 13 September letter is very clear, the last  
14 paragraph of the 13th September indicates that.

15 310 Q. Although in another sense that is a formal 14:57  
16 investigation, a formality compared to what had been  
17 the approach prior to that?

18 A. Yes. Well, it's certainly more formal than bringing  
19 somebody in for a chat and a cup of coffee, yes.

20 311 Q. So the issues are being outlined. Issue one, the SAI 14:57  
21 issue is outlined. And that's, in essence, a triage  
22 issue, and Mr. Carroll updates the meeting on the  
23 number of outstanding issue. He sets, if we scroll  
24 down, an action, which is:

25  
26 "A written action plan to address this issue with  
27 a clear timeline to be submitted to the Oversight  
28 Committee."  
29

14:57

1 Issue 2 is the issue of patient notes:

2  
3 "Work needs to be done to undertake the volume of those  
4 notes which are not properly stored."

14:58

6 Issue 3 is the issue of dictation. Again, a written  
7 action plan is being required. It was agreed to  
8 consider any previous incident reports and complaints  
9 to identify if there were any historical concerns, and  
10 that's left with Mrs. Boyce to pursue. Then, upon  
11 consideration, scrolling down, certain decisions were  
12 reached.

14:58

14 "It was agreed by the Oversight Committee that  
15 Dr. O'Brien's administrative practices have led to  
16 a strong possibility that patients may have come to  
17 harm and should he return to work the potential that  
18 his continuing administrative practices would continue  
19 to harm patients would still exist."

14:58

20  
21 Just on that, Mr. Gibson. This entry here seems to  
22 reflect a change of impression on the part of the  
23 Oversight Committee, at least compared to what was  
24 recorded in September. Here there is explicit  
25 recognition of harm, or at least potential for harm.  
26 Do you know what the trigger for that was?

14:59

27 A. I would image that it is the input of the SAI that  
28 Esther was raising. That was the change.

29 312 Q. That information, at least in a broad sense, was

1 available in September in the sense that if a clinician  
2 doesn't triage, you're left with the risk that patients  
3 are not going to be properly categorised in terms of  
4 their symptoms and the risk to their health. And, of  
5 course, Patient 10's SAI, commencing with an incident 15:00  
6 report, started in January of that year, January 16th.  
7 Do you think, upon reflection, that this realisation of  
8 a risk to patient's health ought to have been better  
9 recognised earlier?

10 A. There's definitely a case to be made that that should 15:01  
11 have been flagged at the 13 September meeting, yes. If  
12 it was known to the people there, absolutely.

13 313 Q. It was determined here that there would be a formal  
14 investigation under MHPS and Mr. O'Brien should be  
15 excluded for its duration. That was a decision that 15:01  
16 was subsequently to be revised in terms of his  
17 exclusion. Have you any recollection of why his  
18 exclusion was considered necessary?

19 A. No, I'd have no recollection of that.

20 314 Q. Beyond this minute? 15:01

21 A. No, nothing. Nothing beyond the minute, no.

22 315 Q. Dr. Wright seemed to suggest in his evidence that the  
23 person to be appointed Case Manager, Dr. Khan, had  
24 input into the exclusion decision, almost suggesting  
25 that it was Dr. Khan's decision or he had some 15:02  
26 ownership of it. Is it not plain to your memory that  
27 this exclusion decision was subject to NCAS advice  
28 a decision of this Oversight Committee at this meeting?

29 A. Absolutely, yes. It was agreed. The minute is clear.

1 316 Q. with the decision made to commence a formal  
2 investigation, your role became one of servicing some  
3 of the initial administrative needs of the process. Is  
4 that fair?

5 A. Yes. Richard asked me to draft up an initial letter 15:03  
6 and to draft up some Terms of Reference on his behalf,  
7 which I then subsequently handed over to Lynne Hainey,  
8 who was providing the HR support. I think a draft came  
9 through which I think I amended to try to make it more  
10 quantifiable and time-bound and statistical in nature. 15:04  
11 Then once the investigation took off I didn't really  
12 have any more involvement after that point.

13 317 Q. Just to pick up on a few points of your involvement:  
14 As you said, you drafted some correspondence that you  
15 thought would be given to Mr. O'Brien. If we can pick 15:04  
16 up on that, please, TRU-251447. Let me just check  
17 that. So this is the draft, I think, that you put  
18 together which you, scroll down through it, scroll down  
19 to the next page, so you are setting out, I think, four  
20 areas, unreported outcomes. Then, scrolling down, 15:05  
21 Issue 4, Non-Compliance with Trust Policy in relation  
22 to the management of private patients.

23  
24 Now, that's not an issue that was discussed at the  
25 Oversight meeting on 22 December. Mr. Haynes had 15:05  
26 reported in to Mr. Weir that that was a concern, and  
27 you were advised of that, is that fair?

28 A. Yes.

29 318 Q. Just in terms of Mr. Haynes' role, was he being kept

1           abreast of developments in his role as Clinical  
2           Director, notwithstanding that he didn't have a role in  
3           urology.

4           A.   Not by me. I don't know if Richard spoke to him to  
5               keep him updated or Esther, as the Director. But not  
6               by me. 15:06

7   319   Q.   It would appear that your inclusion of the private  
8               patient issue derives from Mr. Haynes' input. Is that  
9               fair?

10          A.   Yes, I think that's fair. 15:06

11   320   Q.   An issue arose in relation to whether Mr. O'Brien would  
12               be able to work in a private capacity during his period  
13               of seclusion, and you made some comments in relation to  
14               that. I want to explore that with you. First of all,  
15               if we go to a record of the meeting between Dr. Wright 15:07  
16               and Mr. O'Brien which took place on 30th December.  
17               I know you weren't at that meeting, but I just want to  
18               draw your attention to the record. AOB-010343. It's  
19               said that Mr. O'Brien was made aware of the paragraph  
20               in the MHPS documentation relating to exclusion. He 15:08  
21               queried if he continued to work with private patients.

22  
23               "Dr. Wright suggested that he take advice from his  
24               union, but said that as RMO he would discourage this.  
25               Dr. Wright suggested that Mr. O'Brien ask his 15:08  
26               colleagues to review any private patients that he has".

27  
28               A message is being given to Mr. O'Brien that Dr. Wright  
29               would discourage private work. Is that the way to

1 interpret that?

2 A. Yes.

3 321 Q. That issue was not uncontroversial within the Service.  
4 Let me draw your attention to TRU-00113. Mrs. Gishkori  
5 is commenting on the issue. She has met with the  
6 consultants in urology, this is the context for this  
7 email, and a number of questions have arisen which  
8 she's directing your way to answer.

15:09

9  
10 But in relation to one of the queries which concerns  
11 Mr. O'Brien's ability during exclusion to work with  
12 private patients, she says:

15:09

13  
14 "Mr. O'Brien is at liberty to do what he wants off  
15 Southern Trust premises, but he cannot use the services  
16 of The Trust in the carrying out of his own private  
17 work."

15:09

18  
19 You were not of that view, is that fair?

20 A. Do I reference it further down or above?

15:10

21 322 Q. Let me draw your attention to this, then. TRU-00112.  
22 So this is you answering the series of questions that  
23 centre come your way. If we scroll down to No. 4 and  
24 your advice, presumably through the Medical Director,  
25 is that:

15:10

26  
27 "In line with the Framework, Mr. O'Brien is not  
28 completely at liberty to undertake private practice  
29 outside the Southern Trust. As the responsible officer

1 Dr. Wright advised Mr. O'Brien not to undertake private  
2 work during the period of this investigation, and to  
3 inform any private providers that he was currently  
4 excluded from this main employment. The exception to  
5 this is if Mr. O'Brien felt there were any patient 15:11  
6 safety issues, if this was the case, Mr. O'Brien was  
7 advised that he should arrange transfer of care to  
8 a colleague."

9  
10 You then engaged with Ms. Hainey and you asked her, is 15:11  
11 there merit in referencing the advice given in relation  
12 to undertaking private practice in a letter to  
13 Mr. O'Brien.

14 A. Mm-hmm.

15 323 Q. Looking at the letter that went to Mr. O'Brien, 15:11  
16 AOB-1354. If we scroll through to the last page,  
17 please. Just stop there. He's told about the  
18 four-week exclusion period and it should allow time to  
19 determine a clear course of action. Then it said that  
20 any decisions will, of course, be communicated to him, 15:12  
21 and he is referred to the MHPS Framework and the  
22 relevant paragraphs. One of those paragraphs deals  
23 with the issue of private work during exclusion. Is  
24 that as far as it went, Mr. Gibson? There was no  
25 explicitly worded caution to Mr. O'Brien about private 15:12  
26 work?

27 A. It would appear not in that letter. To be honest,  
28 until now I never made the connection between what  
29 I put in the red type and it not appearing in that

1 letter. So, no.

2 324 Q. why was that issue considered important by the Medical  
3 Director's office?

4 A. I suppose just to keep a tight control on him.

5 325 Q. Ultimately you engaged with various Medical Directors, 15:13  
6 with the Employer Liaison Service of the General  
7 Medical Council. Mrs Donnelly, Joanne Donnelly --

8 A. That's correct.

9 326 Q. -- was at several of those meetings, regularly pressing  
10 the Medical Director to clarify whether Mr. O'Brien was 15:13  
11 able, even despite the lifting of the exclusion, to  
12 continue working in a private capacity if the Medical  
13 Director couldn't assure himself of the safety of that  
14 work. The discussion went as far as a suggestion that  
15 Mr. O'Brien should enter into an undertaking to say 15:14  
16 that he wouldn't perform private work. You remember  
17 that?

18 A. I do recall that, yes.

19 327 Q. Do you know where that issue was left?

20 A. I don't. I would struggle to know where that one went. 15:14

21 328 Q. Was he pressed to provide an undertaking?

22 A. I don't know if Dr. Khan wrote out to him.  
23 I certainly didn't.

24 329 Q. There was a further Oversight Meeting on 10th January,  
25 2017. If we could pick up on that, please. AOB-01363. 15:15  
26 Again, you're in attendance at that. In this meeting,  
27 scrolling down please, which was essentially a review  
28 meeting of trying to work out where the process was at,  
29 the fourth issue, if we scroll down, is private

1 patients. And it was at this meeting, the issue, not  
2 having been discussed at the December meeting, that  
3 a decision was made that it was agreed -- just reading  
4 the last line:

5  
6 "It was agreed by the Oversight Committee that this  
7 work would be...".

15:16

8  
9 Sorry, that's the wrong line. It says:

10  
11 "It would appear that there is an issue of Mr. O'Brien  
12 scheduling his own patients in a nonchronological  
13 manner."

15:16

14  
15 Further information having been received in respect of  
16 nine patients. So was it at this meeting that this  
17 issue formally entered the process?

15:16

18 A. Yes, that's correct.

19 330 Q. The direction of travel here was towards a case  
20 conference that took place on 26 January. And these  
21 are various steps or various issues that arose on the  
22 way to that. Could I ask you about an issue of what  
23 appears to have been some confusion and perhaps some  
24 ill-will, and perhaps maybe some tension, between  
25 yourself and Mrs. Gishkori's office that arose on 20  
26 January. Could we have up on the screen, please,  
27 TRU-251505. That's 251505. To the bottom of the page,  
28 please. So Mrs. Gishkori is writing to you saying that  
29 "Ronan", that is Ronan Carroll was telling her just now

15:16

15:17

1           that you'd been in touch to say that Mr. O'Brien will  
2           be returning to work. He said that:

3  
4           "The Investigating Panel has made this decision after  
5           a barrister's letter came in to The Trust. Can you           15:18  
6           update me please? I need to know how the issue of  
7           potential harm to patients will be managed should  
8           Mr. O'Brien return."

9  
10          And she goes on to explain how other issues will be           15:18  
11          worked through. You respond to that. If we just  
12          scroll up please. Just before we read your email, what  
13          was that about, can you remember? First of all, what  
14          is the barrister's letter and, secondly, had you told  
15          Mr. Carroll that Aidan O'Brien was to return to work           15:19  
16          and that was the decision of the committee?

17        A.   The first question, what was the barrister's letter,  
18              absolutely no idea. In terms of the second one, is  
19              that what I discussed with Ronan? No, whilst I also  
20              don't recall I'm referencing the email that I wrote.           15:19  
21              Richard had asked me if the Oversight Committee decided  
22              to allow Aidan back to work, what kind of work could  
23              Aidan do if he came back under restriction. He asked  
24              me to do another discrete bit of work and try and get  
25              from Michael was there any pieces of work he could be           15:19  
26              doing.

27   331   Q.   Michael Young?

28           A.   Michael Young. Sorry. Yes. That's the last sentence  
29           on that page that is the screen at the moment.

1 332 Q. what you said back to Esther is somehow Ronan has  
2 managed to completely misinterpret this, so you set out  
3 for clarity what you had said.  
4 A. Yes.  
5 333 Q. You explain under MHPS immediate exclusion can only 15:20  
6 last 4 weeks at which point a decision needs to be made  
7 whether to formally exclude. You go on to say:  
8 "With regard to the Aidan O'Brien case, this decision  
9 needs to be taken by 27th January. To prepare for this  
10 Dr. Wright asked you to speak to Dr. Young". 15:20  
11  
12 You did that to ascertain whether he could work  
13 independently or with supervision. You haven't yet had  
14 that discussion with Ronan and you emphasise no  
15 decision has been made. 15:21  
16  
17 Scrolling back up in the direction. Ronan reacts to  
18 this. He didn't misinterpret anything. He takes  
19 exception to this. But he says:  
20  
21 "I didn't tell Esther that the decision had been taken 15:21  
22 to allow Aidan O'Brien to return to work. What I did  
23 say was that I just had a conversation with you."  
24  
25 Mr. Gibson: 15:21  
26  
27 "...the content of which was the possibility of  
28 a return to work."  
29

1 scrolling up the page again. You apologise. Does it  
 2 appear to you on the basis of that that Mrs. Gishkori  
 3 had become somehow confused?

4 A. I think that's a fair reflection. Yes.

5 334 Q. Then, scrolling further up the page, "Simon, thank you 15:21  
 6 for your apology". Then Mrs. Gishkori writes to you to  
 7 say she has concerns in relation to you speaking to  
 8 Mr. Young about anything in relation to this case.  
 9 However, given the serious misinterpretations between  
 10 Ronan, you and I: 15:22

11  
 12 "I think another meeting of the Oversight Committee may  
 13 be the best next step".

14  
 15 She says: 15:22

16  
 17 "Just so I'm clear, did the Oversight Committee meet  
 18 since since the letter from Mr. O'Brien's barrister".

19  
 20 Again, you're none wiser to what the barrister's letter 15:22  
 21 refers to?

22 A. No. I think this is where I go to Richard and say, the  
 23 less said the better, because if you scroll back down  
 24 again, Esther puts in there "given the serious  
 25 misinterpretation between Ronan, you and I". I didn't 15:22  
 26 like that because there was no misinterpretation in  
 27 Ronan and myself, and Esther, there was a  
 28 misinterpretation by Esther. Ronan gave a clear  
 29 message to Esther, Esther misinterpreted it and came to

1 me, yes, you know, I just thought, bite your tongue.

2 335 Q. How is the Inquiry, if it considers it relevant, to  
3 interpret that little sequence? Does that reflect upon  
4 tensions between the Medical Director's office and  
5 Mrs. Gishkori? Does it reflect upon some weakness on 15:23  
6 her part in terms of her ability to interpret basic  
7 messages?

8 A. I certainly wouldn't agree with the first. I don't  
9 think there were tensions. I've worked with Ronan  
10 since 2007 and, yes, we've had our spats, but 15:23  
11 we've always got on and worked well together. I would  
12 hold him in high regard.

13

14 In terms of your second comment, I think that's very  
15 fair. 15:24

16 336 Q. Was that your experience of Mrs. Gishkori?

17 A. Yes.

18 337 Q. Beyond this? Was she well supported in her work?

19 A. Sorry, could you repeat?

20 338 Q. Mrs. Gishkori, was she well supported in her work, do 15:24  
21 you know?

22 A. By whom?

23 339 Q. By the Trust?

24 A. I don't know if I can answer that, to be honest.  
25 I mean she was well-supported by her ADs, I know that 15:24  
26 for certain. I know that the ADs that were working  
27 under her were working very hard. I actually was under  
28 her myself until April '16.

29 340 Q. Well you have reflected a concern, if I can put it in

1           those terms, about how sometimes she related to you and  
2           perhaps others on issues with which you were dealing  
3           with. What is your assessment of that?

4           A.    Sorry, could you repeat?

5   341   Q.    What is your assessment of that in terms of her work           15:25  
6           when it related to your work?

7           A.    Some people you work with you know when the work comes,  
8           you know it will be clear, it will concise, it will be  
9           a high standard, you would know where you're going,  
10          you've got clear direction. I have to say with Esther,           15:25  
11          on occasion, that she may have been a bit more  
12          unstructured, a bit more removed, and certainly  
13          different from the other Directors that we'd had  
14          before.

15   342   Q.    I'm asking these questions because it leads to this:           15:26  
16          Did it, in your view, affect how she managed the Aidan  
17          O'Brien situation?

18          A.    I don't know if I can comment on that. I don't know  
19          whether or not it affected how she behaved with the  
20          AOB-case. I don't know.           15:26

21          CHAIR: It may be a decision for the Inquiry,  
22          Mr. Wolfe.

23   343   Q.    MR. WOLFE KC: Now, the case conference took place on  
24          26th January. TRU-00037. It is at that meeting, if  
25          we scroll down please, slow down there. The Case           15:27  
26          Investigator was Mr. Weir. He presented a report to  
27          this meeting. Scrolling down. It is summarising the  
28          key issues, as you can see, the historical attempts to  
29          address concerns. Then there's a discussion where

1 Mr. Weir is reflecting, I suppose another view of  
 2 Mr. O'Brien as a good, precise, caring surgeon.  
 3 Scrolling on down, please. Stopping there. Then  
 4 Dr. Khan is said to have made a decision:

5  
 6 "As Case Manager, Dr. Khan considered that there was  
 7 a case to answer following the preliminary  
 8 investigation. It was felt that based upon the  
 9 evidence presented, there was a case to answer, as  
 10 there was significant deviation from GMC, Good Medical  
 11 Practice, and the decision was agreed by members of the  
 12 case conference and, therefore, a formal investigation  
 13 would now commence."

14  
 15 Do you understand, Mr. Gibson, the process that was  
 16 followed, taking it back as far as the December  
 17 Oversight Meeting? Was a decision to conduct a formal  
 18 MHPS investigation not taken in December prior to the  
 19 appointment of Messrs Weir and Khan?

20 A. Yes, I believe it was. Yes.

21 344 Q. So what was this process at this case conference?

22 A. I'm not sure whether it was a restating of the same  
 23 decision, or maybe running the same process, but doing  
 24 it with the right people in the room in terms of the  
 25 Case Investigator and the Case Manager, running the  
 26 MHPS process as it should have been run.

27 345 Q. Is that how you think it might be interpreted, to give  
 28 ownership of the process to the two appointees?

29 A. I think, yes, that's an interpretation. Yes.

- 1 346 Q. If you proceed along the line that the decision to  
2 commence a formal MHPS investigation was only taken at  
3 this meeting by the Case Manager, Dr. Khan, if that's  
4 the way to look at it, why were Terms of Reference  
5 being drafted before a decision was made that each of 15:30  
6 the four components, which were later to become five,  
7 but each of these four components were to fall within  
8 the investigation?
- 9 A. Yes, that's a good point. It would seem, reflecting  
10 back now, that there was a bit of a cart before the 15:30  
11 horse there.
- 12 347 Q. Scrolling down the page then. Scrolling down to the  
13 end. It was decided that NCAS would be updated in  
14 relation to the case by Dr. Wright. Do you know if  
15 that was done? 15:31
- 16 A. I don't know if it was done, no. Actually, no, I don't  
17 think it was, was it? Because I think, I didn't know  
18 then, but I think seeing, I think its either Colin's or  
19 Grainne Lynn's evidence to the Inquiry, that they sent  
20 a number of update letters and they didn't get 15:31  
21 responses and they closed it. So I think it possibly  
22 is unlikely.
- 23 348 Q. Now, you engaged in drafting aspects of the Terms of  
24 Reference and they go through various iterations. Just  
25 by way of example, if we go to TRU-251490. You have 15:32  
26 been sent a draft for comment and possible revision and  
27 you have said:  
28  
29 "I have considered this draft in the context of NCAS

1 advice, and amended to try and make TOR as specific,  
2 focused, and quantitative as possible, by adding in the  
3 information presented by Ronan at the 10th January  
4 meeting."

5  
6 You'll recall that, for example, he provided  
7 information about private patients and other figures  
8 around the backlog, et cetera.

9 A. Yes.

10 349 Q. Then you also say:

11  
12 "In particular, the learning from another case in  
13 relation to the nonchronological scheduling of  
14 patients...".

15  
16 Going down to the next page we can see your draft.  
17 Scroll down again, please. Yes. So this is your work.  
18 Scrolling right down and we get to the fourth, which is  
19 the inclusion of private patients. You refer to new  
20 advice received by NCAS, received from NCAS in that  
21 email. Do you know what that is a reference to?

22 A. Yes. I think, actually, that is poorly worded. I  
23 don't know, you may have to scroll back up again.

24 350 Q. I'm happy to scroll back up again.

25 A. Yes, could you, please.

26 351 Q. Go up to the email, please. I shouldn't have said, was  
27 it new advice, I don't think you used that word.

28 A. No, I think that was most probably my mistake in typing  
29 that word "advice". It is mostly in the context of

1 "NCAS guidance" maybe is a better word. Because  
2 I certainly had not got any NCAS advice. We had not  
3 received anything. But in terms of guidance, i.e. the  
4 training that I had taken back in August, and which was  
5 reflected on 13th September, I was trying to then 15:34  
6 re-reflect into these Terms of Reference to make, as I  
7 say there, specific focus in quantitative. So I tried  
8 to tighten it as much as I can.

9 352 Q. Subsequently the Terms of Reference went through  
10 various iterations, the words change here and there? 15:35

11 A. Yes.

12 353 Q. But the most substantive change was the addition of an  
13 issue concerning management input. If we could turn up  
14 TRU-26783. Pull up the right reference.

15 A. I don't think I was involved in that. 15:36

16 354 Q. We'll try and find the document.

17 A. I'm aware of it. I think I know where you're going  
18 with this.

19 355 Q. Yes. In terms of the addition of the --

20 A. Fifth. 15:36

21 356 Q. -- fifth factor, which was an investigation into  
22 management conduct in association with Mr. O'Brien --  
23 there we have it.

24  
25 "To determine if any of the above matters were known to 15:36  
26 line managers within the Trust prior to December 2016  
27 and, if so, to determine what actions were taken to  
28 manage the concerns".  
29 were you consulted on that one?

1 A. No.

2 357 Q. Do you know the origin of it?

3 A. No.

4 358 Q. Do you know why that was thought a necessary inclusion  
5 in the investigation? 15:36

6 A. It would only be my speculation but it was a fact that  
7 this had been attempted to be managed for many years  
8 prior to December 2016 and not particularly  
9 successfully, and that was maybe what they were trying  
10 to get at in that Terms of reference. But that's my 15:37  
11 speculation.

12 359 Q. Speculation.

13 A. Yes.

14 360 Q. The MHPS investigation launched in or about March or  
15 April 2017. You didn't give evidence to that process? 15:37

16 A. No, I wasn't asked to be a witness to that. No.

17 361 Q. Your Medical Director continued to be Dr. Wright until  
18 he went off on sick leave in or about the start of  
19 2018?

20 A. That's correct. 15:37

21 362 Q. He was replaced, at least on an acting up basis or  
22 temporary basis by Dr. Khan, who was also the Case  
23 Manager in the MHPS process?

24 A. Yes.

25 363 Q. He produced an MHPS determination, having received the 15:38  
26 investigation report in or about September  
27 or October 2018. Was that discussed with you?

28 A. No, I don't recall that.

29 364 Q. At or about the end of that year Mr. Haynes contacted

1 you in relation to contact that had been made with  
2 members of medical staff by Mr. O'Brien and/or members  
3 of his family. Can I just draw your attention to this  
4 email, please. TRU-251964. Mr. Haynes is writing to  
5 you and Dr. Khan:

15:39

6  
7 "Are you aware of this? Surely this behaviour (phone  
8 calls from wife and his son/legal adviser to Mr. Young,  
9 below with Mr. Weir) shouldn't happen? How can we (his  
10 colleagues) be protected."

15:39

11  
12 Can you remember receiving that?

13 A. I'll be honest, I can't remember receiving. I remember  
14 viewing it as part of the evidence pack. I'm not sure  
15 whether I took any action on that, or Ahmed took that  
16 forward, I don't recall doing anything directly. So  
17 I think Ahmed, as Medical Director, may have done. But  
18 I am sure it is in the evidence pack.

15:39

19 365 Q. We understand you may have written to Mr. O'Brien, but  
20 you're telling us that you have absolutely no  
21 recollection of this as an issue at the time?

15:39

22 A. Can you scroll down?

23 366 Q. Yes, of course. So what Mr. Haynes is copying you in  
24 to, for example, Mr. Weir's concerns that --

25 A. Yes, I do remember that. Yes, I remember that.

15:40

26 367 Q. If we look at 279201. Dr. Khan, it appears, has  
27 written to Dr. O'Brien in terms there that are  
28 self-explanatory. Then if we look at the page before  
29 that, 279200. Scrolling down, please.

1  
2 You have written a couple of days later telling  
3 Mr. Haynes, Mr. Carroll, that Mr. O'Brien has been  
4 contacted and asking has anyone else been approached.  
5 was it considered, to the best of your memory, that the 15:41  
6 best way to deal with this was at the level of a letter  
7 telling him to stop this? Or can you not remember any  
8 discussion?

9 A. I don't recall any discussion in terms of what  
10 alternatives there were, no. 15:42

11 368 Q. No. An aspect of the return to work arrangements for  
12 Mr. O'Brien was, there's various descriptions for this  
13 but it was a Return to Work Plan or an Action Plan.  
14 That was provided for as part of the lifting of the  
15 exclusion. We can see it at TRU-00732. Is that a plan 15:42  
16 that was solely worked out by the Service, and by that  
17 I mean Mrs. Gishkori and Mr. Carroll, or was it  
18 something that the Medical Director's office was asked  
19 to or was required to take a view on?

20 A. I don't recall, to be honest. I may have received 15:43  
21 a copy, I would have to look. I don't recall.

22 369 Q. You had a sense, it seems, based on your drafting of  
23 the 13th September letter from 2016 as to the kind of  
24 steps that might be required for a robust oversight  
25 arrangement? 15:43

26 A. Mm-hmm.

27 370 Q. But you have no recollection of becoming involved in  
28 this?

29 A. I don't have any recollection, no.

1 371 Q. Deviations from the plan were drawn to your attention.  
2 A. In the October of 2018.

3 372 Q. So in October 2017 you will recall that Mrs. Corrigan,  
4 who had been monitoring Mr. O'Brien's compliance with  
5 the action plan, had been off work and during her 15:44  
6 absence Mr. Carroll discovered that there appeared to  
7 have been, (A) a failure to monitor Mr. O'Brien during  
8 her absence and in those circumstances an apparent  
9 failure to comply with what was required of him. Do  
10 you remember that being drawn to your attention? 15:45

11 A. Yes, I do.

12 373 Q. You engaged with Mr. Carroll around that issue?

13 A. I did.

14 374 Q. Was the Medical Director's office satisfied with the  
15 extent to which, or the rigour with which Mr. O'Brien 15:45  
16 was being monitored?

17 A. When Martina went off and it fell down, and certainly I  
18 was disappointed, I am sure you'll share the email  
19 between Ronan and myself, there was a disappointment  
20 that things had slipped. I appreciate that there's 15:45  
21 multiple priorities on people's time.

22 375 Q. Certainly, if you need assistance, we'll bring the  
23 email up. It's a series of emails, TRU-251527.  
24 TRU-251527. If we start at the bottom of the page,  
25 please. And start with Wendy Clayton, with dictation 15:46  
26 report, and she raises a question about how long  
27 certain charts have been in the office. Go on up the  
28 page, please. And Ronan Carroll is raising the issue  
29 with Michael young and the Associate Medical Director,

1 Mr. Haynes, saying that:

2  
3 "Aidan needs spoken with and asked to address dictation  
4 as soon as possible and asked to address notes."

15:47

5  
6 Going on up the page. Keep going until I see the top  
7 of the email. Thank you. So you are copied, or sent  
8 this from Mr. Weir, still clinical director, and it is  
9 for your "Urgent Consideration". And scrolling down:

15:47

10  
11 "Mr. O'Brien has accumulated a large backlog of  
12 dictated letters and large numbers of charts in his  
13 office."

14  
15 He suggested that he meet, sorry, he is asking for  
16 instructions on how to proceed. He can certainly meet  
17 him I think it should say:

15:48

18  
19 "...with Ronan to discuss and record outcome from any  
20 meeting with him but I need to know if any sanctions  
21 need to be put in place if he has breached any of the  
22 review requirements."

15:48

23  
24 Scrolling back up the page. You say:

25  
26 "What is most concerning here is the monitoring and  
27 supervision arrangements put in place, which  
28 we confirmed to a range of interested parties. If he  
29 has a backlog of clinic letters, have these

15:48

1 arrangements fallen down?".

2  
3 Then scrolling up the page, we'll stop here:

4  
5 "I think you are stating the obvious" says Mr. Carroll: 15:48

6  
7 "With Martina having been off since June, overseeing  
8 function has not taken place and day-to-day activities  
9 were overlooked."

10  
11 In that issue, what was going wrong in the Service that  
12 when Mrs. Corrigan goes off, the monitoring stops?

13 A. I don't know if I would be that close to answer that  
14 specifically, but I think that within that team there  
15 was a relatively small number of managers spread quite 15:49  
16 thin with multiple priorities on their time. I think,  
17 as Ronan has said, it was overlooked.

18 376 Q. Mr. Weir asked whether sanctions needed to be applied.  
19 Presumably not a question that you felt comfortable  
20 answering, perhaps, but the question was directed to 15:49  
21 you and Dr. Khan.

22 A. Yes. I was happy to leave Ahmed to answer that one.

23 377 Q. This was, on the face of it, in late 2018, a deviation  
24 from the action plan, and we were to see further  
25 deviations in 2019. 15:50

26 A. Yes.

27 378 Q. Is it fair to characterise this as nothing was ever  
28 done to challenge these deviations other than perhaps  
29 back to the informal way of the past?

1 Mr. Haynes is saying he's aware of triage not being  
2 done. In September 2019 Mrs. Corrigan flags to  
3 Mrs. Hynds that Mr. O'Brien is not doing his red flag  
4 triage when he's Urologist of the week. On 16th  
5 September of that year she escalates triage and  
6 dictation issues to Dr. Khan. In August Mr. Haynes  
7 highlights that -- sorry, I should say in October he  
8 highlights that dictation from August hadn't been done,  
9 two clinics in August.

15:53

10  
11 That issue comes into your in-tray when Dr. O'Kane asks  
12 you to convene a meeting which took place in  
13 January 2020.

15:53

14 A. That's correct.

15 381 Q. Can you recall that for us, please?

15:54

16 A. Yes. I think that one of the issues that I know that  
17 Mark had, was with the technical nature of how the  
18 information was being monitored. I think there's one  
19 specific element which is in the email that I write  
20 back to Maria, which is towards the end of January.  
21 I think it is the 27th maybe. We went through that  
22 meeting. There was a delay --

15:54

23 382 Q. Maybe just to assist you, we'll pull up your record of  
24 the meeting. It was 24th January. I think at  
25 WIT-55822. The context for this meeting, I think you  
26 set it out in the top of the record. It's in the  
27 context of the backlog report; isn't that right?

15:54

28 A. That's it. Yes.

29 383 Q. Concerns had been expressed that Mr. O'Brien was

1 failing to dictate outcomes following clinics and  
2 Dr. O'Kane had set you the task of meeting with  
3 interested staff for the reasons set out there.  
4 To describe in detail the management plan around the  
5 backlog report, the expectation around compliance, and 15:55  
6 the escalation. This is to assist a meeting with  
7 Mr. O'Brien to discuss his deviation from the Action  
8 Plan.

9  
10 You can take it from there, Mr. Gibson. Help us to 15:55  
11 understand, first of all, what this meeting discussed  
12 and what it achieved, if anything, having regard to the  
13 concern that Mr. O'Brien was deviating on dictation?

14 A. Okay. If you scroll slightly further down on the  
15 email. That's fine, thank you. The first two 15:56  
16 paragraphs really laid out the process as it was  
17 defined in terms of undefined workload. In terms of  
18 backlogs, I think one of the key sentences is the  
19 fourth one in the second paragraph:

20 15:56  
21 "It should be noted that one of the reasons this report  
22 did not receive regular consideration was that there  
23 was some scepticism of the accuracy of this data, as it  
24 did not reconcile with the individual's own  
25 recollection of behavioural workload." 15:56

26  
27 In essence, there may have been inaccuracies in the  
28 data being provided by the secretarial and audio-typist  
29 staff in terms of their data. Therefore, that was

1 creating a concern. Then overlaid on that was that  
2 we discussed at the meeting what is the standard for  
3 delivering reasonable timescales for dictation of  
4 results or letters after clinics, what is the Trust's  
5 standard in relation to that. If you scroll down a bit 15:57  
6 more please. Thank you.

7 384 Q. Just before we go to that, to add a layer or two on  
8 that. The clinician dictates or is supposed to dictate  
9 following a clinical encounter?

10 A. Or operation, yes. 15:57

11 385 Q. That goes to either his medical secretary or the typist  
12 pool?

13 A. Correct.

14 386 Q. There is something called a backlog report.

15 A. Mm-hmm. 15:58

16 387 Q. It is supposed to accurately gather information in  
17 respect of output of typing per clinician. It's  
18 gathered manually, it's not electronic. But it's  
19 supposed to give a sense of where there are gaps or  
20 where there are delays in the production of dictation. 15:58

21 A. Or where there are pressures in terms of, you know,  
22 maybe giving support to audio typists or secretaries,  
23 that maybe work could be moved around slightly by their  
24 supervisors a bit to try and assist, yes.

25 388 Q. Is there a flaw in the system in that if a doctor 15:58  
26 doesn't dictate, that won't be known?

27 A. That's a fair point. Yes.

28 389 Q. The standard, you were going to go on to tell us the  
29 standard turnaround time. Is the fact simply that

1           there wasn't one?

2           A.    That's correct.

3   390   Q.    Escalation then I think was the third point?

4           A.    Yes.  So it's clear there was no standards identified.  
5                   There was some question marks in relation to the                   15:59  
6                   validity.  And then, combining those, there was no  
7                   process for escalation concerns regarding  
8                   non-compliance.  So that kind of combined to basically  
9                   say, we have an issue here, which, therefore, would  
10                  make it challenging to hold Mr. O'Brien to account in               15:59  
11                  terms of his work because of the inherent weaknesses in  
12                  the system as I described it there.

13   391   Q.    Just on that.  If we start with the proposition that  
14                  Mr. O'Brien had been handed a clear, objectively  
15                  verifiable standard with which to comply with.  If               16:00  
16                  we look at the Action Plan that had been set for him.  
17                  If we go to TRU-00733.  Scrolling down, please.  It  
18                  records as an action:

19  
20                  "An outcome/plan/record of each clinic attendance must            16:01  
21                  be recorded for each individual patient and this should  
22                  include a letter for any patient that did not attend as  
23                  there must be a record of this back to the GP".

24                  The paragraph before that:

25  
26                  "The dictation must be done at the end of every clinic  
27                  and a report, via digital dictation, will be provided  
28                  on a weekly basis to the Assistant Director of Acute  
29                  Services, Anaesthetics and Surgery to ensure that all               16:01

1 outcomes are dictated."

2  
3 Is that not a clear Action Plan to hold Mr. O'Brien to  
4 account with? In other words, Mr. Gibson, I'm  
5 struggling to understand why this was viewed as so 16:02  
6 problematic at the meeting on the 23/24 January, when  
7 what this plan provided for was instant dictation at or  
8 within the clinic and then a digital dictation record  
9 on a weekly basis.

10 16:02  
11 Then, if I can just add to this before getting to the  
12 question. If you look at TRU-279849. This is emailed  
13 to Dr. Khan from Martina Corrigan escalating the issue  
14 in September. I think it's 14th September. Just  
15 scrolling down, please. She is able to say, that 16:03  
16 "Concern 3", that is the dictation issue:

17  
18 "...is not adhered to. Mr. O'Brien continues to use  
19 digital dictation but I have done a spot check today."

20 16:03  
21 This is September and she finds the following  
22 shortcomings in his dictation, which is a similar email  
23 from Mr. Haynes elsewhere in the bundle.

24 So what were the complications highlighted in your  
25 January meeting that were seemingly causing a barrier 16:03  
26 to engaging with Mr. O'Brien on what should have been  
27 a fairly straightforward issue?

28 A. I think it was a combination. If we can go back to the  
29 email of the lack of standards and --

1 392 Q. Forgive me. He had been set a clear standard.  
2 Regardless of the rest of the world, he had been told  
3 get it done. There might have been a more flexible  
4 approach with other clinicians, and that's certainly  
5 reflected in the January meeting, but that sort of 16:04  
6 varying standard wasn't the one that was applied to  
7 him?

8 A. Mm-hmm.

9 393 Q. Isn't that right?

10 A. That's a good point, yeah. 16:04

11 394 Q. It is the case -- we can go back to that January  
12 record, WIT-55822. If we just go to the last page of  
13 it, please, or the last paragraph. Keep going, please.  
14 So there's a Conclusion -- stop there. The Conclusion  
15 was that: 16:05

16

17 "Those present felt that the best way to move this  
18 topic forward was for a group of interested staff to  
19 agree and describe why this information is being  
20 collated? For example, is it largely resource or 16:06  
21 secretarial workload. "

22

23 Is that something, Mr. Gibson, general to the  
24 problem --

25 A. Yes. 16:06

26 395 Q. -- as opposed to specific to Mr. O'Brien?

27 A. Absolutely. Yes.

28 396 Q. Each of these features of the Conclusion are generally  
29 system related, how can we improve the system?

1 A. It was a fairly technical meeting, a system wide  
2 technical meeting rather than anything specific.

3 397 Q. Then, as regards Mr. O'Brien, at the bottom of the  
4 page:

5

16:06

6 "Considering the processes outlined above in the wider  
7 sense of supporting medical staff who have had issues  
8 identified, I feel there would be benefits in an urgent  
9 discussion regarding the day-to-day management of  
10 Mr. O'Brien by his operational line management to  
11 ensure that supervision of his administrative duties  
12 are being carried out as expected. This would allow an  
13 opportunity to identify if there are any concerns  
14 starting to emerge, so that appropriate supports can be  
15 offered to ensure that concerns do not continue".

16:06

16:07

16

17 Just on the dictation issue, was that essentially  
18 pushed to one side? We can't grapple with this with  
19 Mr. O'Brien because of these technical concerns about  
20 the system, notwithstanding the clear identification  
21 standard set out in his action plan?

16:07

22 A. I mean I understand what you're saying in terms of set  
23 to one side. Maybe it was we needed to get these  
24 issues resolved to allow an easier management of Aidan  
25 in terms of this issue. But you're quite right, the  
26 standards were set, so maybe he didn't require this  
27 level of detail.

16:08

28 398 Q. Was he ever challenged in respect of the dictation  
29 failures which Mr. Haynes and Mrs. Corrigan had

1 identified in the middle of 2019?

2 A. I'm not aware.

3 399 Q. Did this meeting, specifically focused on Mr. O'Brien,  
4 ever take place?

5 A. I'm not aware.

16:08

6 CHAIR: Mr. Wolfe, I am just conscious of the time.

7 I am just wondering will you be much longer?

8 MR. WOLFE KC: One more issue.

9 CHAIR: I think we'll just sit on then, ladies and  
10 gentlemen.

16:08

11 MR. WOLFE KC: Please. Thank you, I appreciate it.

12 400 Q. You had various interactions with Ms. Donnelly of the  
13 GMC?

14 A. That's correct.

15 401 Q. I just want to draw your attention to and seek your  
16 response on one strand of that. If we go to  
17 TRU-161683. You attend with Dr. Wright at a meeting,  
18 with Ms. Donnelly, on 8th February '17. At  
19 that meeting RW, as we can see here, says that:

16:09

20  
21 "An SAI is almost complete and the MHPS investigation  
22 is in progress."  
23

16:09

24 This is, as I've said, 8th February 2017. The action  
25 associated with this, you can see in the right-hand  
26 margin, is to send JD, Joanne Donnelly, a copy of the  
27 SAI report as soon as it's received. Now, if we go to  
28 the next meeting, TRU-161700. Just scrolling down,  
29 please. So the way this works is it recaps on the

16:10

1 February meeting.

2 A. It is the next page.

3 402 Q. We'll go across then, go down, please, to the July  
4 meeting.

5 A. Yes. Halfway down is the important bit. 16:11

6 403 Q. Sorry, I'm still not seeing it myself.

7 A. I think maybe -- well.

8 404 Q. Yes. So at that time, and this is, as I've said, July  
9 '17, the SAI investigation in respect of Patient 10 had  
10 completed? 16:11

11 A. That's correct.

12 405 Q. It had reported by March 2017 --

13 A. That's correct.

14 406 Q. ....to the best of my recollection, a second grouped  
15 SAI, involving five patients, including Patient 11, 12, 16:11  
16 13, 14 and 15, was about to get underway but had been  
17 delayed due to difficulties in obtaining an independent  
18 external Chair who ultimately became Dr. Julian  
19 Johnston.

20 A. Yes. 16:12

21 407 Q. Now, Dr. Wright is telling Joanne Donnelly that the SAI  
22 investigation is not yet complete when in fact the  
23 investigation that was alluded to at the February 2017  
24 meeting --

25 A. Was complete. 16:12

26 408 Q. Was Patient 10's, which had been completed?

27 A. That is correct.

28 409 Q. The undertaking to provide Donnelly of the GMC with  
29 a copy of the SAI report had not yet been complied

1 with. Then we have this confusion. Can you explain  
2 how that came about?

3 A. I think confusion is a fairly good summary. I think  
4 that the first SAI is ongoing when we meet Joanne  
5 in February. It then completes in March. We meet 16:13  
6 again on 25 July. Joanne asks, well, is the SAI  
7 complete? My interpretation, and it is only that based  
8 on this, is that Richard is assuming she is talking  
9 about the Julian Johnstone SAIs which have only just  
10 begun, but actually she is talking about the SAI 16:13  
11 in February which was just nearing completion.

12  
13 I don't know whether Richard clarified the difference  
14 between the two and, in the absence of that  
15 clarification, I don't think Joanne would have been 16:14  
16 aware of the distinction between the first SAI and the  
17 second, what I would call "Julian Johnstone SAIs". So  
18 he replies and says, oh, we have only just started,  
19 Julian Johnson has just been Chaired. Joanne maybe  
20 takes that at face value assuming it is the one that 16:14  
21 was still going on February, and that mistake repeats  
22 itself through further meetings with Joanne Donnelly.

23 410 Q. But both yourself and Dr. Wright were well aware that  
24 the report you referred to in February, or the SAI you  
25 referred to in February carried with it an obligation 16:14  
26 to get that report to Donnelly when it was available?

27 A. Yes.

28 411 Q. That hadn't been done?

29 A. Yes. I mean it was down as an action for Richard to

1 send the report when it was finished. I wasn't aware  
2 that that hadn't been done. Then, when we're starting  
3 to go to the meeting in June -- sorry, the July meeting  
4 on the 27th and the subsequent ones, I'm also assuming  
5 that they're referring to the Julian Johnstone SAIs. 16:15

6 412 Q. Can I take you to December 18? There had been  
7 a meeting with Ms. Donnelly on 4th December. If  
8 we look at TRU-264717. Just scroll down, please.  
9 Ms. Donnelly is writing to Dr. O'Kane who had attended  
10 with you on 4th December? 16:15

11 A. That's correct.

12 413 Q. Ms. Donnelly says:

13  
14 "I understand that Simon advised that he would forward  
15 to me the relevant SAI and MHPS reports." 16:16

16  
17 That was a week earlier. She has still never been  
18 given the SAI report from the previous year and she  
19 hadn't been given the MHPS report when it was ready in  
20 the summer. She has had to come asking for it. Then 16:16  
21 she's asking for it again because eight days after the  
22 meeting you haven't sent it. Was there a tendency to  
23 play cat and mouse with the GMC or is that unfair?

24 A. I think that's unfair in this context in that looking  
25 back I know that we had to get it redacted. I know 16:17  
26 that Siobhán Hynds, who was the HR support, had that  
27 redacted and handed a copy of that to Dr. Khan's  
28 office. I wasn't aware of that and had to, kind of,  
29 chase it up, and that's why it took me from the 4th to

1 the 18th. So that to me was just a question of getting  
2 a redacted copy. It came through Siobhan's office. It  
3 was hand delivered. I wasn't made aware that it had  
4 been hand delivered. Once I chased it, Siobhan told me  
5 and I found it and sent it.

16:17

6  
7 With regard to the SAI, I mean, obviously, at that  
8 point the Julian Johnston SAIs were still ongoing and  
9 had not been reported. The subsequent SAIs had not  
10 been reported either. So I think that relates maybe to 16:18  
11 Joanne's assumption that they were finished when they  
12 weren't finished.

13  
14 I note that in the note of the meeting of 4th December  
15 it's noted that I say that the SAIs are completed, but 16:18  
16 I just believe that that is an inaccuracy in her Action  
17 Note. Because I wouldn't have said that, because  
18 I know they weren't finished their time, and I wouldn't  
19 have been that close to the SAIs, in terms of, you  
20 know, my portfolio was more on the medical education, 16:18  
21 medical workforce side of the house. So I wouldn't  
22 have been that close to it.

23 414 Q. Did she ever receive Patient 10's SAI?

24 A. I don't know, is the honest answer.

25 415 Q. Just, finally, if we could look at what she says when 16:18  
26 she has an opportunity to review the MHPS report.

27 TRU-264716. Scroll down, please.

1 So she sets out the issues which she thinks are  
2 significant arising out of MHPS and she says:

3  
4 "On the basis of the information you have provided. .".

16:19

5  
6 The second paragraph here or the third paragraph:

7  
8 "These concerns appear to me to meet the threshold for  
9 referral to the GMC as they are allegations of serious  
10 and persistent failures."

16:19

11  
12 She includes, amidst her description, actual harm to at  
13 least five patients and potential harm to a large  
14 number of patients.

16:19

15  
16 The Inquiry will have the time to reflect at it's  
17 leisure on what is said and what is recorded in the  
18 meetings with the GMC. Do you think the GMC was given  
19 a full and accurate picture of the concerns in relation  
20 to Mr. O'Brien's practice during those meetings in '17  
21 and '18 before it received the MHPS report?

16:20

22 A. No. Looking at the action notes from the DLA meetings,  
23 I think they are quite brief. I think all it says is  
24 that the MHPS investigation is ongoing. It doesn't go  
25 into any detail.

16:20

26 416 Q. Was that a deliberate policy for good reasons or bad  
27 reasons?

28 A. I don't think so. I think that maybe there was an  
29 assumption that waiting for the report to conclude,

1 before discussing the outcomes with the GMC, I don't  
2 think it was a deliberate attempt to obfuscate or deny  
3 information to the GMC. If anything, it was just  
4 a conservative approach, maybe.

5 MR. WOLFE KC: Thank you for your evidence. I have no 16:21  
6 further questions.

7 A. Thank you.

8  
9 MR. SIMON GIBSON WAS QUESTIONED BY THE INQUIRY AS  
10 FOLLOWS: 16:21

11  
12 CHAIR: Unfortunately there are still a few more  
13 questions for you. I'm going to ask Dr. Swart to  
14 start.

15 417 Q. DR. SWART: You have given specific answers to specific 16:21  
16 things. Mine are more general questions, really.  
17 Just to start with, I can understand why Dr. Wright  
18 wanted you to do a rapid investigation, for want of  
19 a better word, into the issue around the components of  
20 the concerns for Mr. O'Brien, but when it came to 16:21  
21 talking to NCAS, why was it that he asked you to make  
22 the phone call to NCAS when it's nearly always a senior  
23 clinician who does that? Did you have a discussion  
24 with him about that?

25 A. I can't recall any specific discussion. I had been at 16:22  
26 the NCAS training literally the week before. As I said  
27 earlier, I had a relationship with Colin from  
28 a previous life. I think it was Colin that gave the  
29 training on 30th August.

1 418 Q. Right.  
2 A. I don't think it was any more complicated than that.  
3 In hindsight, obviously, yes, I should have said no,  
4 but I was relatively new in post and had developed  
5 a good working relationship with Richard; he asked me 16:22  
6 and I said yes.

7 419 Q. You were a bit naive to the process at that stage is  
8 what you are telling me.  
9 A. There was an element of that, yes.

10 420 Q. The advice that NCAS gave falls into the category of 16:22  
11 fairly standard conservative kind of advice. It all  
12 seems quite sensible. It wasn't discussed at length at  
13 the Oversight Committee, even though you'd some of it  
14 in verbally. In fact, no account seems to have been  
15 taken of it. Did you have a chance to talk to 16:23  
16 Dr. Wright about the advice and about his thoughts  
17 about it? He was an experienced Medical Director in  
18 terms of MHPS and NCAS. What conversations did  
19 you have about it?

20 A. I don't recall the detail. I recall making a note of 16:23  
21 the issues that Colin had made in terms of suggestion.  
22 I then would have gone to Richard and briefed him on  
23 those, and then we set up the Oversight Committee. It  
24 is, as I said earlier, it is inconceivable it wasn't  
25 discussed. 16:23

26 421 Q. It must have been.  
27 A. Yes. Whether it was discussed in the level of detail  
28 that subsequently came in the letter of the 13  
29 September, I can't put my hand on my heart, and others

1 may be able to give their view when they come before  
2 you. But it certainly was discussed, it's  
3 inconceivable that it wasn't.

4 422 Q. What is your view about the way the Oversight Committee  
5 worked. It was set-up in a certain way. I think 16:24  
6 we have established that the custom and practice was  
7 actually slightly different.

8 A. Yes.

9 423 Q. Did that work as a decision-making Committee?

10 A. It certainly changed over time. It's a lot stronger 16:24  
11 now. I think that the due process and the policies are  
12 followed to the letter and I think the organisation has  
13 learnt from that. But at the time it's clear, after  
14 spending a day of this, we can see where the issues  
15 were, yes. 16:24

16 424 Q. So, one of the things that appears to us is that most  
17 of the Clinical Managers in the Trust didn't really  
18 know anything about the Oversight Committee. It wasn't  
19 kind of a recognised structure, which leads me on to  
20 ask you about how you interacted with the Clinical 16:25  
21 Associate Directors and CDs in general. Was there  
22 a sense that that group of people were working together  
23 with the Medical Director in a senior leadership team.  
24 Dr. Wright has described his desire to make that so.  
25 What did it feel like to you when you joined that team, 16:25  
26 not now so much, but at that time?

27 A. I felt it was a good team. I suppose I came to it  
28 slightly differently because I would have known them in  
29 my day job prior to August, because I was managing

1 medicine, and unscheduled care, and obviously there's  
2 a heavy emergency element of care in terms of moving  
3 people through the system. So I would have had a lot  
4 of contact with the medics.

5  
6 So I would like to think I had a good relationship with  
7 all the CDs and AMDs. The AMDs did meet monthly and  
8 I would have attended those meetings. The CDs,  
9 I think, maybe was a bit looser. I think we had, it  
10 may have been quarterly meetings with the CDs in  
11 general, but I wouldn't say they were consistently  
12 held. So that may be something which needed to be  
13 looked at.

16:25

16:26

14 425 Q. You reference that three Deputy Medical Directors were  
15 appointed, or about to be appointed. What are they  
16 covering and how has that changed the dynamic in terms  
17 of your role and the AMDs?

16:26

18 A. Well, certainly I think when Dr. O'Kane came in she  
19 realised that the senior medical leadership was light.  
20 We had a medic involved in Revalidation and Appraisal  
21 with not that many PAs. Damian Scullion he was  
22 expanded into that role. Then we had a Deputy Medical  
23 Director for Governance and Patient Safety. And then  
24 a third for Medical Education/Medical workforce. And  
25 that certainly, I think, strengthened the process in  
26 terms of supporting medical staff and then it gave  
27 another avenue for the Medical Director to direct work.

16:26

16:27

28 426 Q. Has that changed your dynamic and your role at all?

29 A. Well, the one thing is that I would not be as involved

1 with doctors in difficulty. Because there's a medical  
2 doctor, so Aisling Diamond is the Deputy Medical  
3 Director for Medical workforce and I'm aware that  
4 she would be involved in issues, a broad range of  
5 issues in terms of those kind of issues. So I don't  
6 get as closely involved now. 16:27

7 427 Q. So, as we have been looking at this today and in all  
8 the documentation we've seen, it appears as if the  
9 Clinical Managers, the Clinician Directors and AMDs  
10 were not really involved in the screening report and 16:28  
11 the decisions thereafter. In fact, they weren't even  
12 told about it.

13  
14 It also appears that they weren't involved in the  
15 Monitoring Plan. Yet they are supposed to be managing 16:28  
16 the doctors professionally. Now, do you think that was  
17 deliberate? Was there an attempt to keep them  
18 separate?

19 A. No. I would absolutely not think that it was  
20 deliberate. I think we've heard much of the blurred 16:28  
21 lines between operational and clinical management.  
22 But, no, certainly in this case you would have heard  
23 yesterday, and I would concur completely with Colin in  
24 terms of his close relationship with Martina.

25 428 Q. I meant in terms of this specific issue, we don't have 16:28  
26 a Clinical Manager preparing a report for the Oversight  
27 Committee, we don't have anybody at the Oversight  
28 Committee. We don't have anybody involved in the  
29 decision. When the monitoring plans are agreed, none

1 of the Clinical Managers know what it is. Can you see  
2 how we might think that is a bit odd?

3 A. Yes, I genuinely don't think that was deliberate,  
4 I really don't. I think that was more a failure within  
5 the process rather than something more malignant than 16:29  
6 that.

7 429 Q. Going forward, you know, if you have to do all of this  
8 again, apart from the things we have already talked  
9 about, what do you think the key learning for you  
10 personally from this is, from that whole dynamic? 16:29

11 A. In terms of my learning, is around the importance of  
12 communication with all the stakeholders from the very  
13 get-go. And that, if you do use and apply the policy  
14 properly from the get-go, it has the potential to work.

15 430 Q. As you look back now, can you see that right from the 16:29  
16 beginning there was a very clear Patient Safety issue  
17 here?

18 A. Yes. I can.

19 DR. SWART: Thank you.

20 CHAIR: Thank you Dr. Swart. Mr. Hanbury. 16:29

21 MR. HANBURY: Thank you. I would like to go back when  
22 you were formulating your plans for Mr. O'Brien before  
23 the MHPS was launched at the end of 2016, there was one  
24 thing on the outpatient backlog and your thoughts about  
25 70 patients-a-month being a reasonable. 16:30

26 A. Oh, yes.

27 431 Q. If you do the math of 12-a-clinic, that is about an  
28 extra clinic and a half a week for an already  
29 overwhelmed clinician. How did you think that was

1 going to work?

2 A. I mean, it would have been a challenge. It may have  
3 meant other things having to be stepped down. I mean,  
4 yes, he was a very diligent and hard-working clinician.  
5 There is no question about that. So I think that once 16:30  
6 that discussion had been had with him, it would have  
7 been a question of sitting down operationally and  
8 saying, right, what is your week going to have to look  
9 like? What do we have to drop off? It wouldn't have  
10 been fair to work him into the ground so there must 16:30  
11 have been other things that had to be stepped down.

12 432 Q. Or, I guess, getting additional help in?

13 A. Yes.

14 433 Q. Thank you. Moving on to your submission to NCAS and  
15 the anecdotal delayed referral to oncology. So we have 16:31  
16 looked at Patient 102, it is an interesting case. It  
17 appears that an MDT, having been diagnosed with  
18 prostate cancer, it was agreed to be referred to  
19 oncology. One of the problems was, he was seen  
20 appropriately by Mr. O'Brien the following week, and 16:31  
21 the dictation was never done. And this was only picked  
22 up a year later when he came up and saw Mr. Haynes for  
23 follow-up. Mr. Haynes reported this. So my question  
24 to you is, why was this anecdotal? Why was this not  
25 a robustly looked into case? 16:32

26 A. I suppose because at the time I wasn't aware of that  
27 IR1. It only came to my attention during my  
28 preparation for this Inquiry. So the only recollection  
29 I would have had, was it would have been an informal

1 discussion with me. None of that was presented to me.

2 434 Q. Looking back, what should have happened then before it  
3 to come to you if it was a failure of identifying --

4 A. In terms of the incident reporting process, yes, that  
5 somehow slipped up somehow, yes.

16:32

6 435 Q. In retrospect, if that had been happening 2014, that's  
7 worrying, would you not agree?

8 A. Yes.

9 MR. HANBURY: Thank you. That's all I have.

10 CHAIR: I will not ask you anything further. Thank you  
11 very much for coming along and speaking to us,  
12 Mr. Gibson.

16:32

13  
14 Tomorrow morning then at 10 o'clock. I think we have  
15 Mrs. Corrigan; is that correct?

16:33

16 MR. WOLFE KC: Mrs. Corrigan, at 10 o'clock.

17 CHAIR: Yes. 10 o'clock tomorrow morning.

18  
19 THE INQUIRY ADJOURNED TO THURSDAY, 23RD FEBRUARY 2023  
20 AT 10:00

16:33
